PRODUCTS AND SERVICES

PRODUCTS AND SERVICES

3Dconnexion

3DCONNEXION

3Dconnexion Inc. develops functional, ergonomic hardware and smart, easy-to-use software that work together perfectly to make working in the world's most popular CAD applications and 3D environments fast, comfortable and fun.

From SpaceMouse to CadMouse, **3Dconnexion** products provide CAD professionals with an excellent way to interact with and explore the digital world. There are wired and wireless, large and small devices, as well as accessories and software for them.

THE MAIN PRODUCTS:

▷ **SpaceMouse Enterprise** features superior ergonomics, 12 programmable application command buttons, LCD display, custom view keys and more. It provides flawless 3D navigation for high-end CAD ecosystems

▷ **SpaceMouse Pro Wireless** and **SpaceMouse Pro** provide professional 3D navigation and advanced ergonomic design. It is the optimal tool for engineers, designers and architects to create 3D designs in various industries

▷ **SpaceMouse Enterprise Kit 2** and **SpaceMouse Wireless Kit 2** also include additional accessories such as mouse cases and mouse pads

▷ **3Dconnexion Keyboard Pro with Numpad** is an ergonomic keyboard for engineers, designers and makers. The main module has 12 separate programmable keys, and the additional one has 4 keys. The keyboard has a modular wireless part of the numeric keypad, and it is suitable for both right-handed and left-handed users

▷ **SpaceMouse Compact** and **SpaceMouse Wireless** have been designed to provide intuitive, precise, advanced 3D navigation in CAD applications. It's the perfect tool for viewing 3D designs and exploring 3D spaces in a conveniently compact form

▷ **The CadMouse** family is a dedicated line specifically designed for design and engineering professionals. With improved ergonomics and accurate calibration, it delivers exceptional comfort and quiet operation. There are versions for both right-handed and left-handed users

A10 NETWORKS

A10 Networks (NYSE: ATEN) provides secure application services for on-premises, multi-cloud and edge-cloud environments at hyperscale. Our mission is to enable service providers and enterprises to deliver business-critical applications that are secure, available and efficient for multi-cloud transformation and 5G readiness. We deliver better business outcomes that support investment protection, new business models and help future-proof infrastructures, empowering our customers to provide the most secure and available digital experience. Founded in 2004, **A10 Networks** is based in San Jose, California and serves customers globally.

MAIN ACTIVITIES:

NETWORKING, APPLICATION SECURITY AND DELIVERY

▷ **Thunder series appliances (ADC, NGWAF, CGNAT)**
Flexible solution based on the Thunder series appliances, which include Application Delivery Controller (ADC), Next-Generation Web Application Firewall (NGWAF), and Carrier-Grade Network Address Translation (CGNAT), offers to the customers agile and solicited solutions, which result in improved security, hyperscale delivery, higher reliability and lower TCO. Additionally, it enables service providers and enterprises to preserve existing IPv4 investment and transition to IPv6

AUTOMATED DDOS DEFENSE

▷ **Thunder Threat Protection System (TPS)**
With scalable and automated DDoS protection powered by AI and advanced machine learning we help you combat the growing problem of multi-vector and IoT DDoS attacks to avoid business downtime, lost revenue, and damaged reputation

TRAFFIC VISIBILITY

▷ **Thunder SSL Insight (SSLi)**
We help provide a foundation for zero trust edge defense, ensuring your network is protected from SSL/TLS encrypted cyber attacks by enabling decrypted traffic inspection via your enterprise perimeter security infrastructure

SERVICE ANALYTICS AND MANAGEMENT

▷ **A10 Harmony Controller**
We deliver centralized management and granular actionable analytics for Secure Application Services across on-premises data centers and public, private, and hybrid cloud

ADVANTECH

Advantech is a leader in next-generation factories, industries, industrial sites and intelligent infrastructure facilities construction projects. The company offers a wide range of automation devices, Internet of Things (IoT) components, server and network solutions based on the latest advances in IT, Cloud, BigData and AI. **Advantech** is also working with partners to co-create business ecosystems that foster the development of the smart industry and realize the corporate goal of "Creating a Smarter Planet".

MAIN ACTIVITIES:

▷ Software for industrial facilities Advantech WISE (WebAccess/SCADA, EdgeLink, XNavi, DataConnect, Energy & Environment Solutions, Factory Solutions)

▷ Intelligent systems (modular computers, industrial motherboards and chassis)

▷ Servers for highly virtualized telecommunications, industrial and corporate hybrid environments (GPU servers, storage servers, Edge servers, industrial motherboards and chassis)

▷ Computer vision systems (AINavi software, VisionNavi software, UHD video converters and streamers, NVIDIA GPU and AI cameras, industrial cameras, video capture cards)

▷ Human-machine interface (HMI) components and industrial monitors and video panels (Panel PC, high performance control panels, industrial terminals and thin clients, HMI components, industrial monitors)

▷ Automation computers (compact industrial PCs, IoT gateways, Advantech iDoor peripheral interfaces).

▷ Intelligent transport platforms (computer platforms and controllers for rail and road transport, information panels and controller systems for passengers, traffic control and management systems)

▷ Solutions for critical applications in telecommunications, railway, defense and aviation (intelligent roadside signaling control, AI/machine vision on rolling stock, 6U CPCI and 3U/6U VPX solutions)

▷ Utilities and energy solutions (IEC-61850-3 certified industrial computers, smart wireless gateways, SCADA software)

▷ EtherCAT solutions and automation

▷ Intelligent motion control (PCI/PCIE motion cards, motion controllers, terminal blocks and cables)

▷ High Speed DAQ Raw Data Acquisition Systems (control measurements, machine condition monitoring, signal conditioners and terminal blocks, PCI/PCIe digital and analog I/O cards, USB)

▷ Industrial communications, Ethernet/Wireless switches, mobile network gateways, automotive OBD2 converters and telemetry gateways

▷ Intelligent edge data collection devices Intelligent Edge DAQ (Intelligent Remote Terminal Unit with support for various sensors and communication protocols Ethernet, Modbus, RS-232/485, Wi-Fi, ZigBee, GPRS/LTE, etc., intelligent IoT I/O gateways, modular I/O systems).

▷ Remote I/O, wireless I/O and various wireless sensors (Ethernet, OPC UA Ethernet, RS-485, LPWAN, LoRaWAN, Wi-Fi, NB-IoT, LTE-M, 4G-LTE, 5G), sensors with Mesh architecture support Serial/USB communication (converters, repeaters, hubs, isolators and surge suppressors, PCI/PCIe cards PR-232, RS-422, RS-485, CAN)

AEG
POWER SOLUTIONS

AEG POWER SOLUTIONS

MAIN ACTIVITIES:

- ▷ Uninterruptible power supplies
- ▷ Industrial UPS
- ▷ Solar inverters
- ▷ DC systems
- ▷ UPS accessories

AEG Power Solutions is a global leader in developing and supplying electronic systems and power solutions for key industrial needs.
AEG Power Solutions' portfolio of products and services combines AC and DC technologies to provide complete solutions for both conventional and renewable energy sources, as well as a wide range of specialized industrial applications where reliability and efficiency are critical.

The company's concept is focused on innovative solutions and progressiveness in the energy field in accordance with market needs.
In the Renewable Energy Solutions business segment, **AEG Power Solutions** provides solar energy equipment, including inverters and turnkey solutions for photovoltaic systems. Combined with monitoring systems, they allow **AEG** to offer customers balanced systems for solar power plants.

Energy Efficiency Solutions offers reliable custom and standard products for energy systems, such as UPS systems, inverters, chargers, and power supplies that provide uninterrupted power to large-scale industrial infrastructure enterprises, including oil and gas industries, transportation, power generation, electricity transmission and distribution as well as continuous production.

AETEK

AETEK is a developer of IP surveillance technologies, PoE products and adaptive peripherals designed for using with IP cameras of various manufacturers in shared network. The company's mission is to integrate various devices into the IT infrastructure of organizations and make their installation easier.

MAIN ACTIVITIES:

SECURITY POLICIES MANAGEMENT

▷ Devices for Ethernet networking, including those with PoE support, over long distances, using twisted pair, coaxial cable, as well as transmission over two strands of twisted pair

▷ Switches for communication over twisted pair, coaxial cable, two-wire cable, also with remote diagnostics and monitoring of the entire facility's network infrastructure topology

▷ Industrial switches with PoE, including ones powered by 12–56V DC

▷ Ready-made solutions in the form of rugged cases with a switch, an SFP port, an uninterruptible power supply, fan, heater, thermostat, lightning protection and input circuit breaker

▷ Box camera housings, with support for varifocal lenses with long focal lengths, as well as adjustable IR illuminators

AJAX DISTRIBUTOR

AJAX SYSTEMS

AJAX SYSTEMS specializes in the development of wireless home and office security systems that combine engineering innovations, proprietary know-how and technological design. Security systems with smart home capabilities represent an entire ecosystem of various devices, mobile and desktop applications, and server infrastructure. Ajax's portfolio includes control centers with native operating system (RTOS), motion sensors, opening sensors, flood protection, fire sensors, street and home alarms, smart sockets and relays, etc.

MAIN ACTIVITIES:

- ▷ Intrusion Protection
- ▷ Video Surveillance
- ▷ Fire Detection
- ▷ Flood Prevention
- ▷ Wireless Automation Devices
- ▷ Smart Home Sensors

MUK
Classics of distribution

ALGOSEC

AlgoSec is a leader in network security policy management solutions. **AlgoSec** products enable information security departments to effectively manage the complex policies of multi-vendor firewalls, virtual private networks (VPNs), routers and their associated devices. The company's solutions are used in more than 900 organizations in 40 countries around the world and make it possible to simplify the infrastructure audit and control, increasing the efficiency and manageability of corporate networks.

MAIN ACTIVITIES:

SECURITY POLICIES MANAGEMENT

- ▷ AlgoSec Security Management Suite firewall policy management system
- ▷ Firewall Analyzer (AFA)
- ▷ Automation of AlgoSec FireFlow security policy changes
- ▷ Security policy management with a focus on AlgoSec BusinessFlow applications

ALIBABA CLOUD

Alibaba Cloud provides a comprehensive, reliable cloud computing platform that offers a range of services and features tailored to meet the diverse needs of businesses and developers. The company has an extensive network of data centers located around the world, which allows it to effectively serve customers in various regions. **Alibaba Cloud** operates 88 availability zones in 29 regions, delivering low latency and high availability to users.

The company offers a comprehensive range of cloud computing services to suit various needs.

MAIN ACTIVITIES:

COMPUTING

▷ Cloud servers
- Elastic Compute Service
- CloudBox
- Compute Nest
- Dedicated Host
- ECS Bare Metal Instance
- WUYING Workspace (EDS)
- Elastic GPU Service
- Simple Application Server
- Auto Scaling
- Alibaba Cloud VMware Service

▷ HPC
- Batch Compute
- Elastic High Performance Computing
- Super Computing Cluster

▷ Edge computing
- Edge Node Service
- Edge Network Acceleration

▷ Serverless solutions
- Function Compute
- Serverless App Engine

▷ Alibaba Cloud Linux operating system

CONTAINER SERVICES

▷ Cloud server
▷ Container Service for Kubernetes (ACK)
▷ Container Registry
▷ Service Mesh
▷ Distributed Cloud Container Platform for Kubernetes (ACK One)
▷ Container Service for Kubernetes Serverless
▷ Elastic Container Instance

STORAGE

▷ Essential Storage Service
- Block Storage
- Object Storage Service (OSS)

- File Storage NAS
- Cloud Parallel File Storage (CPFS)
- Tablestore
- Storage Capacity Unit

▷ Storage Data Service
- Simple Log Service
- Cloud Backup
- Drive and Photo Service

▷ Data Transport & Tools
- Data Transport
- Cloud Storage Gateway

▷ Hybrid Cloud Storage
- Hybrid Cloud Storage
- Hybrid Cloud Distributed Storage

NETWORKING & CDN

▷ Cloud Network
- Server Load Balancer
- Elastic IP Address
- Cloud Data Transfer
- Data Transfer Plan
- Virtual Private Cloud (VPC)
- NAT Gateway
- Network Intelligence Service (NIS)
- PrivateLink
- Alibaba Cloud DNS PrivateZone
- Global Traffic Manager

▷ Cross Region Network
- Cloud Enterprise Network (CEN)
- Global Accelerator
- Transit Router

▷ CDN
- CDN
- DCDN

▷ Hybrid Cloud Network
- Express Connect
- Smart Access Gateway
- VPN Gateway

SECURITY

▷ Cloud Security
- Anti-DdoS
- Bastionhost
- Cloud Firewall
- Security Center
- Web Application Firewall (WAF)

▷ Security Service
- Managed Security Service
- Penetration Test

▷ Data Securitys
- Certificate Management Service
- Cloud Hardware Security Module (HSM)
- Key Management Service
- Data Security Center (Original SDDP)

▷ Identity Security
- Identity as a Service (IDaaS)
- Resource Access Management (RAM)

▷ Business Security
- ID Verification
- Fraud Detection
- Content Moderation
- CAPTCHA

MIDDLEWARE

▷ Micro Services Tools & Platform
- Application High Availability Service
- Enterprise Distributed Application Service
- Microservices Engine (MSE)
- Service Mesh

▷ ApsaraMQ
- ApsaraMQ for Confluent
- ApsaraMQ for Kafka
- ApsaraMQ for MQTT
- ApsaraMQ for RabbitMQ

- ApsaraMQ for RocketMQ
- Message Service (MNS)

▷ Applications Integration
- EventBridge

▷ Observability
- Application Real-Time Monitoring Service (ARMS)
- Managed Service for Grafana
- Managed Service for OpenTelemetry
- Managed Service for Prometheus

DATABASE

▷ Relational Database
- Application High Availability Service
- Enterprise Distributed Application Service
- Microservices Engine (MSE)
- Service Mesh

▷ ApsaraMQ
- PolarDB for MySQL
- PolarDB for PostgreSQL
- PolarDB for Xscale
- ApsaraDB RDS for MySQL
- ApsaraDB RDS for PostgreSQL
- ApsaraDB RDS for SQL Server
- ApsaraDB RDS for MariaDB

▷ NoSQL Database
- ApsaraDB for Redis
- Tair
- Lindorm
- ApsaraDB for MongoDB
- ApsaraDB for Hbase
- Time Series Database for InfluxDB®

▷ Data Warehouse
- AnalyticDB for MySQL
- AnalyticDB for PostgreSQL
- ApsaraDB for ClickHouse
- ApsaraDB for SelectDB

▷ Database Management Tools
- Data Transmission Service

- Database Backup
- Data Management
- Database Autonomy Service (DAS)

ANALYTICS COMPUTING

▷ Data Computing & Analytics
- Alibaba Cloud Elasticsearch
- Hologres (Interactive Analytics)
- MaxCompute
- Realtime Compute for Apache Flink

▷ Data Lakes
- Data Lake Formation
- E-MapReduce

▷ Data Application and Visualization
- DataV
- Quick BI

▷ Data Development & Services
- DataHub
- Integration
- Dataphin
- DataWorks
- Optimization Solver

AI & MACHINE LEARNING

▷ Platform for AI
▷ Vector Retrieval Service
▷ AIRec
▷ Machine Translation
▷ PAI-Lingjun Intelligent Computing Service
▷ Intelligent Robot
▷ Image Search
▷ Offline Visual Intelligence Software Packages
▷ Intelligent Speech Interaction
▷ OpenSearch

MEDIA SERVICES

▷ ApsaraVideo Live
▷ ApsaraVideo Media Processing (MPS)

- ApsaraVideo VOD
- Real-Time Streaming

ENTERPRISE SERVICES & CLOUD COMMUNICATION

▷ Enterprise Cloud Services
- CloudQuotation
- Energy Expert
- Robotic Process Automation (RPA)
- SOFAStack
- ZOLOZ Real ID
- ZOLOZ SMART AML

▷ Enterprise Foundation Services
- Alibaba Cloud DNS
- Domain Names
- GoChina ICP Filing Assistant
- WHOIS

▷ Blockchain Servicesr PostgreSQL
- Blockchain as a Service

▷ Cloud Communication
- Chat App Message Service
- Phone Number Verification Service
- Short Message Service
- Voice Service

INTERNET OF THINGS

▷ Cloud Display
▷ IoT Edge
▷ IoT Platform

SERVERLESS

▷ Applications Integration
- CloudFlow
- EventBridge
- Message Service (MNS)

▷ Computing
- Function Compute
- Serverless App Engine
- Container Service for Kubernetes Serverless

DEVELOPER TOOLS

▷ API & SDK

- Cloud Shell
- OpenAPI Explorer
- OpenAPI Portal
- Resource Orchestration Service
- SDK Center

▷ Apsara DevOps
- Alibaba Cloud DevOps Pipeline (Flow)

▷ Development & OM
- API Gateway
- EMAS HTTPDNS
- EMAS Mobile Testing
- EMAS Superapp
- mPaaS

MIGRATION & O&M MANAGEMENT

▷ O&M and Monitoring
- Application Real-Time Monitoring Service (ARMS)
- CloudMonitor
- CloudOps Orchestration Service
- Intelligent Advisor
- Managed Service for OpenTelemetry
- Simple Log Service

▷ Cloud Management
- ActionTrail
- Cloud Architect Design Tools (CADT)
- Cloud Config
- Cloud Governance Center
- Quota Center
- Resource Access Management (RAM)
- Resource Management

▷ Backup & Migration
- Cloud Backup
- Cloud Migration Hub
- Database Backup
- Data Transmission Service

APSARA STACK

AMAZON WEB SERVICES

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud, offering over 200 fully featured services from data centers globally. Millions of customers – including the fastest-growing startups, largest enterprises and leading government agencies – are using **AWS** to lower costs, become more agile and innovate faster.

TOP PRODUCT CATEGORIES:

▷ Compute
▷ Storage
▷ Database
▷ Networking & Content Delivery
▷ Analytics
▷ Machine Learning
▷ Security, identification and compliance

AMETEK®

AMETEK

AMETEK is a leading global manufacturer of electronic instruments and electromechanical devices. **AMETEK's** portfolio includes UPSs for medical equipment with international certification, process monitoring, testing, calibration, data collection instruments for manufacturing, aerospace, electric power and other industries.

MAIN ACTIVITIES:

▷ Uninterruptible AC Power supplies
▷ Uninterruptible High Power DC Power Supplies
▷ Solutions for the medical industry

APC by Schneider Electric

APC's solutions provide protection against some of the leading causes of downtime, data loss and hardware damage, power problems and temperature. Its comprehensive solutions, designed for both business and home users, improve the manageability, availability and performance of sensitive electronics, networking, communications and industrial equipment of all sizes.

MAIN ACTIVITIES:

UNINTERRUPTIBLE POWER SUPPLIES
▷ Back-UPS
▷ Smart-UPS
▷ Easy UPS
▷ GALAXY
▷ SYMMETRA

POWER DISTRIBUTION
▷ Rack power distribution
▷ Modular Power Distribution Systems
▷ Load switches

COOLING
▷ Precision air conditioning systems (InRow and perimetric)
▷ Chillers and economizers
▷ Hot/cold aisle containment systems

SAFETY AND ENVIRONMENTAL CONTROL
▷ Environmental parameters monitoring systems
▷ Access control

RACK SYSTEMS
▷ Server and network racks
▷ Rack mounting components
▷ KVM Consoles

CONTAINERIZED DATA CENTER
▷ Pre-assembled and modular solutions

DATA CENTER ENGINEERING INFRASTRUCTURE CONTROL AND MONITORING SYSTEMS

APPDYNAMICS

part of Cisco

APPDYNAMICS

AppDynamics offers one of the most powerful application monitoring solutions in a distributed infrastructure. The **AppDynamics** software platform allows to collect performance data for various applications, servers, databases and other critical IT systems from all infrastructure nodes. It has the tools to proactively monitor, manage and optimize the most complex IT infrastructures. In case of applications bugs, the platform automatically warns about the necessity of urgent intervention of technical specialists to fix them. Real-time monitoring increases control over the capacity of applications, infrastructure components, and how applications are perceived by end users.
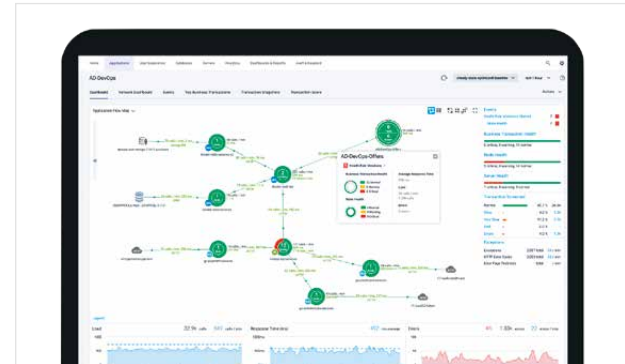

MAIN ADVANTAGES OF THE PRODUCT:

▷ Complete overview of On-premise architecture along with Cloud environments

▷ Performance optimization in an increasingly dynamic and fragmented technology landscape

▷ Prioritization of the most important issues before they affect business processes

▷ Maintaining business continuity during technological change with a platform that reduces noise and maintains fast and efficient operation

▷ Data collection and analysis across the entire stack

▷ Detailed visualization that helps to take action and improve user experience and business results

▷ Configuration just in a few minutes with Smart Code Instrumentation

▷ AppDynamics is constantly updated with an evolving ecosystem of industry solutions ADO.NET, Docker, Apache, Node.js, Python, AngularJS, and more

ARISTA

ARISTA NETWORKS

Arista Networks is a globally recognized leader in the network equipment industry, renowned for its innovative and high-performance solutions. Founded in 2004, the company has consistently pushed the boundaries of networking technology, providing reliable, scalable, and efficient infrastructure solutions for a wide range of industries. Arista's commitment to excellence is evident in its comprehensive portfolio of Layer 2 and Layer 3 switches, which cater to diverse needs from data centers to enterprise environments.

A standout feature of Arista's offerings is the **Arista Extensible Operating System** (EOS), a Linux-based modular operating system that is uniform across all devices. This OS not only ensures high performance but also offers a ready-made API for seamless integration into any infrastructure. Arista's EOS is designed to deliver the highest performance with switching fabric latencies as low as 450 nanoseconds, making it an ideal choice for environments where speed and reliability are paramount.

MAIN ACTIVITIES:

SWITCHES
- 7800 Series
- 7500 Series
- 7300 Series
- 7280 Series
- 7170 Series
- 7160 Series
- 7150 Series
- 7130 Series
- 7060X Series
- 7050X Series
- 7020R Series
- 7010 Series
- 750 Series
- 720XP Series

SOFTWARE AND PLATFORMS
- CloudVision: Arista's CloudVision software continues to provide comprehensive management and monitoring for both on-prem and cloud environments
- Awake AI-Driven Security Platform: Enhances network security with AI-driven insights and monitoring
- DANZ Monitoring Fabric: Provides pervasive, context-driven network observability
- Key Features
- Arista EOS: The Linux-based modular operating system remains a core feature, offering high performance and integration capabilities
- Zero Trust Networking: All Arista solutions continue to support the highest global security standards and the Zero Trust Networking concept

HPE aruba networking

HEWLETT PACKARD ENTERPRISE COMPANY

Hewlett Packard Enterprise company is a leading provider of next-generation mobile enterprise infrastruc-tures. The company's Mobile Virtual Enterprise (MOVE) architecture integrates all the elements of mobility – access management, network infrastructure and mobile applications – into a single system that strengthens security and simplifies BYOD initiatives.

MAIN ACTIVITIES:

NETWORKING SOLUTIONS

▷ Aruba Access Points: Deliver high-performance Wi-Fi for indoor and outdoor environments. They support the latest Wi-Fi 6 and Wi-Fi 6E standards, ensuring fast and reliable connectivity for all devices

▷ Aruba Switches: Offer a range of options from access and aggregation switches to campus core and data center switches. These switches provide high availability, scalability, and security, making them ideal for modern network infrastructures

▷ Aruba Gateways and Controllers: Centralize network management and enhance security with advanced features like role-based access control and dynamic segmentation. They ensure seamless connectivity and policy enforcement across the network

SECURITY SOLUTIONS

▷ Aruba ClearPass: Provides comprehensive network access control (NAC) and policy management. It ensures secure access for users and devices, whether they are on wired, wireless, or VPN networks

▷ Aruba IntroSpect: Uses machine learning to detect and respond to advanced threats. It analyzes user and entity behavior to identify anomalies and potential security breaches

MANAGEMENT AND OPERA-TIONS

▷ Aruba Central: A cloud-based network management platform that simplifies the deployment, management, and optimization of wireless, wired, and SD-WAN environments. It offers AI-powered insights and automation to enhance network performance and reliability

▷ Aruba AirWave: Provides on-premises network management with detailed visibility and control over the entire network. It supports multi-vendor environments and offers robust monitoring and reporting capabilities

LOCATION SERVICES

▷ Aruba Meridian: Enables location-based services such as wayfinding, asset tracking, and proximity-based notifications. It leverages Bluetooth beacons and mobile apps to enhance user experiences in various environments like hospitals, retail stores, and campuses

SD-WAN SOLUTIONS

▷ Aruba EdgeConnect: Delivers a comprehensive SD-WAN solution that optimizes application performance and enhances security. It simplifies WAN management and reduces costs by leveraging broadband internet and other transport services

IOT SOLUTIONS

▷ Aruba IoT: Integrates IoT devices into the network securely and efficiently. It supports a wide range of IoT protocols and provides visibility and control over IoT traffic.and other transport services

SERVICES AND SUPPORT

▷ Aruba Professional Services: Offers consulting, design, and deployment services to help organizations optimize their network infrastructure. These services ensure that networks are designed and implemented to meet specific business needs

▷ Aruba Support Services: Provide ongoing technical support and maintenance to ensure network reliability and performance. They include options for 24/7 support, hardware replacement, and software updates

AUDIOCODES

AudioCodes provides high-quality voice over IP network solutions, specializing in IP telephony and audio compression methods. Their product range includes analog and digital voice gateways, IP phones, SBCs, and media gateways specifically designed for Skype for Business and Microsoft Teams.

THEIR MAIN ACTIVITIES INCLUDE:

▷ Multifunctional analog and digital gateways that enable traditional telephony to access IP networks.
▷ IP phones that offer improved sound quality with broadband support.
▷ Enterprise Session Border Controller solutions that connect enterprise IP telephone networks to IPT operators.
▷ Solutions that integrate traditional telephony with new communication systems.
▷ Call recording systems that allow registration and logging from both IP and analog/digital lines

ASUS

ASUS is one of the leading manufacturers of computer equipment. The company's products are in great demand all over the world. It is distinguished by reliability, performance, innovation and thoughtful ergonomic design. The high quality of the materials used in the company's devices is achieved thanks to special composite compounds that combine metal and plastic, providing them with both lightness and durability. The **ASUS** lineup is designed for a wide range of tasks and allows it to meet any customer needs.

MAIN ACTIVITIES:

▷ Desktop PCs
▷ Laptops
▷ All-in-one devices

AUTODESK
Value Added Distributor

AUTODESK

Autodesk Inc. is a leader in the development of software solutions for architectural and mechanical engineering, design, graphics and animation. **Autodesk** software allows to implement effectively and efficiently anything for each of these areas. Solutions from the company contain tools that are at the forefront of progress, from cloud services to machine learning and artificial intelligence. **Autodesk** provides software products for the people who create the objects around us.

AVIGILON

Avigilon defines the future of security systems by developing innovative HD video surveillance solutions with built-in analytics. The company is taking video surveillance to the next level with the fastest icident search tools, superior image quality, the finest built-in analytics and industry-leading **Avigilon Control Center** software with HDSM technology.

MAIN ACTIVITIES:

VIDEO SURVEILLANCE SYSTEMS WITH VIDEO ANALYTICS
▷ Self-learning neural network technologies
▷ Software
▷ High-definition cameras with a resolution of up to 10K (61 MP)
▷ Recording devices
▷ Encoders
▷ Accessories

ACCESS CONTROL

3RD PARTY SYSTEMS INTEGRATIONS

AXIS COMMUNICATIONS

Axis Communications offers solutions for video surveillance, access control, intercom and audio systems, and intelligent analytics applications. Network video surveillance cameras are a key part of the vendor's portfolio. The equipment can be connected to various IP networks, providing remote video surveillance and recording anywhere in the world. The cameras have advanced video analytics functions and can also detect intrusion by motion detection and provide an alarm in case of unauthorized actions.

Due to their high quality and security, **Axis** products are used worldwide in various sectors – transportation, banking, education, healthcare, industrial and commercial. They are well suited for hotels, sports facilities, data centers, penitentiary institutions, casinos, and "safe city" projects.

MAIN ACTIVITIES:

▷ Network cameras
▷ Network intercoms
▷ Access control
▷ Intelligent audio systems
▷ Wearable devices

▷ Video servers and workstations
▷ System devices
▷ Analytics
▷ Video management software

Barracuda®

Your journey, secured.

BARRACUDA NETWORKS

Barracuda Networks provides powerful, easy-to-manage, affordable solutions to protect users, applications and data. The list of the company's clients includes more than 150,000 organizations worldwide.

The **Barracuda Networks** portfolio includes security, networking, and storage products based on network devices and cloud services. These solutions protect against spam email, web surfing, hackers and threats from instant messaging services.

The company also offers tools to counter threats like spam, spyware, Trojans and other malware. **Barracuda Networks** solutions provide web traffic filtering, load balancing, message archiving, backup services and data protection

MAIN ACTIVITIES:

EMAIL PROTECTION
▷ Email Protection
▷ Email Threat Scanner
▷ Email Security Gateway
▷ Message Archiver
▷ PST Enterprise

APPLICATION&CLOUD SECURITY
▷ Cloud Application Protection
▷ WAF-as-a-Service
▷ Web Application Firewall
▷ Cloud Security Guardian
▷ Load Balancer ADC
▷ Vulnerability Manager
▷ Data Inspector

NETWORK SECURITY
▷ CloudGen WAN
▷ CloudGen Firewall
▷ CloudGen Access
▷ Firewall Insights
▷ Web Security Gateway

▷ Content Shield
▷ Firewall Control Center
▷ Secure Connector

DATA PROTECTION
▷ Backup
▷ Data Inspector

BENQ

BenQ is one of the founders of the digital age and the modern digital lifestyle. The company's products regularly win international design and performance awards. **BenQ** has extensive manufacturing resources and rich experience in design, display technology, mobile solutions and networking. The company offers a wide range of digital products and devices – projectors, LCD monitors, information and interactive panels, digital cameras, mobile devices and other electronics.

MAIN ACTIVITIES:

PROJECTORS
▷ Business and Education
▷ For large halls and auditoriums
▷ For home
▷ Portable

MONITORS
▷ Stylish solutions
▷ Design and technology
▷ Color management

▷ Business
▷ Home and office

DASHBOARDS
▷ General purpose
▷ Interactive solutions
▷ Special purpose
▷ To create video walls

INTERACTIVE SOLUTIONS

BITDEFENDER

Bitdefender is a developer of anti-virus, anti-spam and firewall systems characterized by high performance and efficiency with low resource requirements. As a global security technology company, **Bitdefender** supplies its solutions to more than 100 countries worldwide through a partner network of distributors and resellers.
Since 2001, **Bitdefender** has been providing award-winning business and consumer protection solutions and is a leading security provider for virtualization and the cloud technologies.

MAIN ACTIVITIES:

SECURITY PACKAGES
- GravityZone Business Security Enterprise
- GravityZone Business Security Premium
- GravityZone Business Security
- GravityZone Security for MSPs

SECURITY AS A SERVICE
- Managed Detection and Response
- Managed Detection and Response Services for MSPs

SECURITY PRODUCTS
- GravityZone XDR
- Cloud and Server Security
- Security for Containers
- GravityZone Security for Email
- Endpoint Detection and Response
- GravityZone Security for Workstations
- GravityZone Security for Mobile Devices
- GravityZone Patch Management
- GravityZone Storage Security

BITTITAN

BitTitan is a provider of cloud migration and data management business process automation solutions for enterprise and mail systems. The company offers MigrationWiz, an industry-leading SaaS solution that enables you to migrate mailboxes, documents, shared folders and a number of other cloud services from a wide range of sources and destinations.

MAIN ACTIVITIES:

MIGRATIONWIZ SYSTEM FOR FULLY AUTOMATIC MIGRATION OF HUGE DATA TO MICROSOFT OFFICE 365/MICROSOFT EXCHANGE

BLUETTI

BLUETTI is a manufacturer of portable power stations, energy storage systems and mobile solar systems with high quality and performance. **BLUETTI** products solve the problems of backup power and power availability anywhere without access to the energy grid. The company's devices can provide autonomous operation and charge laptops, tablets, smartphones, network equipment, electric vehicles, and various household appliances.

MAIN ACTIVITIES:

▷ Portable power stations
▷ Expansion battery modules
▷ Solar panels
▷ Accessories

CAMBIUM NETWORKS

Cambium Networks is a global leader in proven wireless network access solutions. Due to its comprehensive portfolio of reliable, scalable and secure wireless narrowband and broadband access platforms, **Cambium Networks** enables service providers, industrial enterprises, private corporations, governments and utility companies to build affordable, reliable and high-performance communications networks.
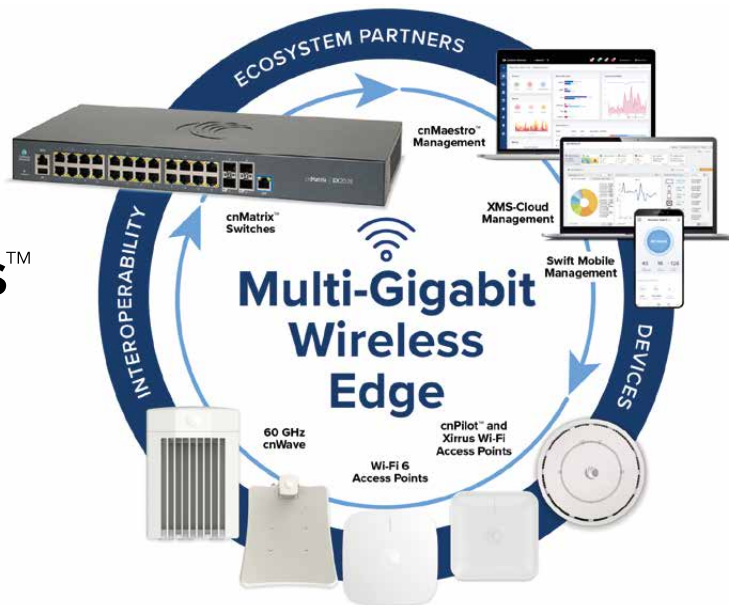

MAIN ACTIVITIES:

- Fixed Wireless Access
- Point-to-Point Wireless Connections
- Wi-Fi Wireless Access Points
- Ethernet Switches
- Fiber Infrastructure

- Security and SD-WAN
- Industrial Internet of Things
- Bridge-in-a-Box
- Management & Applications

CANON

Canon is a recognized world leader in the production of printing equipment and imaging systems thanks to its innovative technologies and pioneering approach. The companies have entered into a cooperation agreement for business products – office and project solutions.

MAIN ACTIVITIES:

▷ A3 and A4 color and black-and-white multifunctional printers of the i-SENSYS X, imageRUNNER, imagePRESS, imageRUNNER ADVANCE and ADVANCE DX series
▷ Consumables for these printers
▷ ImageFORMULA series desktop document scanners
▷ Software for workflow optimization

Centerm

CENTERM

Since its founding in 2002, **Centerm** has been focusing on digital transformation solutions for banks and companies with a disparate branch structure. According to IDC analytics company, the **Centerm** brand is one of the top three global manufacturers of remote work equipment, thin and zero clients, along with HP and Dell.

The **Centerm** portfolio includes products for a wide range of virtualization environments to suit companies of all sizes. **Centerm** thin clients provide high performance and efficiency, providing customers with a number of advantages: security, ease of management and reliability. In addition to terminals, **Centerm** also produces a number of other corporate products: mini PCs, monoblocks, software for managing your devices, mobile and payment terminals, as well as self-service terminals for companies in the financial sector.

MAIN ACTIVITIES:

- Zero clients
- Thin clients
- Mini PC
- Monoblocks

- Counters
- Mobile terminals
- Self-service terminals
- Payment terminals

CHECK POINT™

YOU DESERVE THE BEST SECURITY

CHECK POINT

Check Point Software Technologies offers a comprehensive solution system that protects the information, corporate network resources, remote users and business communications. Among the company's strategic products are a security gateway (which can be either a hardware firewall or a virtual device for private and public clouds), a single security client to protect network endpoints and remote workers and a single console for managing all security tools from one point.

MAIN ACTIVITIES:

▷ Secure web gateways with extensible functionality (UTM devices)

▷ Devices to protect against zero-day threats, unknown and targeted attacks by analyzing the behavior of files (sandbox)

▷ Remote access gateway/blade

▷ Server for centralized security policy management and log files analysis

▷ Protection against account hijacking, malware, zero-day threats and confidential data leaks for corporate cloud applications Office 365, G Suite, etc. (Harmony Email&Collaboration)

▷ Comprehensive protection of private virtual environments from VMware, Cisco, Open Stack, Microsoft, etc., as well as public cloud infrastructure AWS, Microsoft Azure, Oracle, Google, etc. (CloudGuard Network)

▷ Ensuring secure work from mobile devices, protecting access to company documents

▷ Unified Endpoint Security clients to protect workstations (antivirus, HDD and USB encryption, port control, traffic filtering, protection against zero-day threats and ransomware, incident analysis)

▷ Specialized solutions to ensure the threats detection and prevention in SCADA and IoT (Internet of Things) systems

CISCO SYSTEMS

Cisco Systems is a global leader in information technology, communications and collaboration solutions that are transforming the way people communicate. The company focuses on the following core business areas: Routing, Switching, Wireless technologies and Security, Solutions for Small and Medium businesses, Data Center & Virtualization Solutions, Collaboration Solutions, Video Technologies & Architectures for Business Transformation.

MAIN ACTIVITIES:

NETWORK HARDWARE

▷ Routers
  • routers with integrated services for building distributed corporate networks
  • high performance core and aggregation routers
  • high performance routers for network service provider
  • Software Defined Wide Area Network (SD-WAN) routers

▷ Switches
  • Cisco Business switches for small businesses
  • access switches for corporate networks and service providers
  • core and distribution switches for corporate networks and service providers
  • switches for data centers supporting Fiber Channel, Fiber Channel over Ethernet, iSCSI, Ethernet technologies

▷ Network devices management and monitoring software

▷ Optical and wireless solutions configuring and designing software

IP TELEPHONY AND COLLABORATION

▷ Phones and video devices
▷ Solutions for audio and web conferencing
▷ Cisco Jabber – collaboration from any workspace
▷ IP-PBX and voicemail
▷ Contact Center – as a single entry point based on IP infrastructure
▷ Cisco Webex Cloud Collaboration Solutions

VIDEOCONFERENCING

▷ Personal systems
▷ Meeting room systems
▷ TelePresence systems
▷ Servers for organizing multipoint videoconferencing
▷ Infrastructure for organizing video calls and videoconferencing
▷ Unified management system for organizing and conducting videoconferences (TMS)

SECURITY

▷ Next-Generation Intrusion Prevention Systems (NGIPS)
▷ Cisco Secure Firewalls with active threat protection
▷ Security with global threat intelligence, real-time malware protection implemented in Cisco Secure Endpoint
▷ Cisco Secure Malware Analytics unified malware analysis and threat intelligence
▷ Cisco Secure Client software for secure remote access and mobility
▷ Cisco Secure Email
▷ Cisco Secure Web Appliance web traffic protection
▷ Cisco Security Management Appliance (SMA) control system
▷ Cisco Umbrella secure internet gateway and secure mobile access
▷ Cisco CloudLock for cloud users, data and applications protection

▷ Cisco Identity Services Engine (ISE) centralization of network access control policies
▷ Cisco Secure Network Analytics anomalous traffic and behavior detection, including zero-day malware, distributed denial of service (DDoS) attacks
▷ Cisco Encrypted Traffic Analytics (ETA) encrypted traffic analysis, detection of known attack signatures help maintain security while maintaining privacy
▷ Cisco DUO software for MFA and corporate policy compliance
▷ Cisco Secure Email Threat Defense security solution for MS Office 365
▷ Cisco Secure Web Application Firewall and Bot Protection, security of web applications, mobile applications and APIs from attacks
▷ Cisco Secure Workload zero-trust approach to secure your application workloads in cloud and on-premise environments, micro-segmentation
▷ Simplify investigations with comprehensive threat detection and response actions with data-backed insights with Cisco XDR
▷ Enforcing modern cybersecurity while providing a seamless and frictionless experience as users connect from anything to anywhere, via a common access approach with converged cloud security solution Cisco Secure Access

WIRELESS SOLUTIONS

▷ Wi-Fi 6 and Wi-Fi 6E (802.11ax) access points
▷ Access points for solving problems of any complexity (802.11a/b/g/n/ac/ax standards, indoor/outdoor operation, over wide temperature ranges, internal/external antennas)
▷ Controllers scalable from 2 to 6000 access points (optional cloud controller), up to 64 000 clients
▷ Wireless infrastructure accessories
▷ Cisco DNA Spaces - detection and location of mobile clients based on data from access points, as well as analytics and services based on location
▷ Cisco Business Wireless access points for small offices

CISCO UNIFIED COMPUTING SYSTEMS

▷ Cisco UCS C-Series rack servers
▷ Cisco UCS B-Series blade servers
▷ Cisco UCS X-Series modular system
▷ Cisco UCS Director private cloud management system
▷ Cisco UCS Central multi-domain management
▷ Cisco Compute Hyperconverged with Nutanix
▷ Converged (integrated) infrastructure for data centers (Flexpod, VersaStack)
▷ Unified management system for servers, blade servers, SANs and LANs, and network virtualization

▷ Cisco Intersight – IT operations management platform with built-in analytics for Cisco and third-party IT infrastructure
▷ Cisco Workload Optimization Manager (CWOM) – software for Cisco equipment workload optimization

VIRTUALIZATION

▷ Virtual implementations for each technological direction (routing, switching, security, videoconferencing)
▷ Cisco Catalyst Center Virtual Appliance designed for NetOps, AIOps, SecOps, and DevOps workflows
▷ Cisco server solutions with virtualization technologies hardware support

CISCO SUPPORT SERVICE

▷ Success Tracks: personalized, multi-level, expert customer support through the unique CX Cloud platform
▷ Advance replacement of equipment
▷ Cisco 24/7 Technical Assistance Center (TAC)
▷ Software support and updates
▷ Expanded access to Cisco.com and Cisco knowledge bases
▷ Advanced services: design, implementation, testing and support of complex projects

CISCO CLOUD SOLUTIONS

▷ Meraki
▷ Webex
▷ Cloudlock
▷ Umbrella
▷ Cisco Secure Malware Analytics
▷ Cisco Secure Cloud Analytics
▷ Cisco Secure Endpoint
▷ Cisco Secure Workload
▷ Cisco XDR
▷ Cisco Secure Email
▷ Cloud Email Security
▷ Cisco Secure Email Threat Defense
▷ Cisco Secure Access by Duo
▷ ThousandEyes

SOFTWARE DEFINED NETWORKING SOLUTIONS

▷ LAN
  • Catalyst Center
  • Catalyst 9k switches
  • Catalyst 9k WiFi6 APs
▷ WAN&Security
  • SD-WAN Software
  • ISE
  • Cisco cEdge, C1100x, Catalyst 8k, ASR, ENSC routers
▷ DC
  • Cisco Application Centric Infrastructure solution

Cognyte
Formerly a Verint company

COGNYTE

Cognyte Software is an Israeli company specializing in security analytics software development. The company's software aggregates, analyzes and visualizes disparate datasets at scale to help security organizations find the information they need. The **Cognyte** platform allows you to accelerate security investigations and successfully identify, neutralize and tackle threats to national and personal security. The company has over 1000 government and corporate clients in over 100 countries.
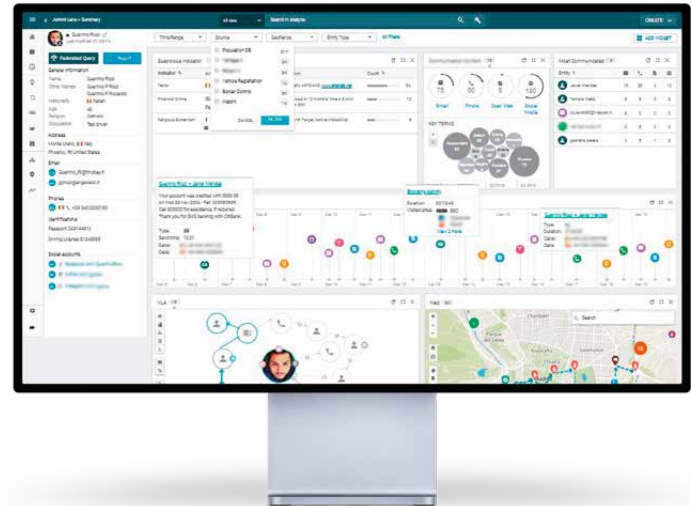

MAIN ACTIVITIES:

▷ Cognyte Comprehensive Analytics Platform for Big Data Analysis

▷ Investigation Analytics
  • web analytics
  • blockchain analytics

▷ Operational analytics

▷ Threat analysis
  • cyber threat detection
  • situational analytics

COMMSCOPE®

COMMSCOPE

COMMSCOPE is the world's largest provider of broadband, enterprise and wireless infrastructure solutions. As a leader in the structured cabling system (SCS) industry, **COMMSCOPE** offers its customers the most advanced cable infrastructure solutions for modern buildings and data centers under the SYSTIMAX and NETCONNECT brands (formerly AMP Netconnect).

MAIN ACTIVITIES:

▷ Components for shielded and unshielded SCS lines Category: 5e, 6, 6A, 7, 7A, 8
▷ Components for fiber-optic SCS lines, based on fibers: OM3, OM4, OM5, OS2, OS1a
▷ Advanced pre-terminated solutions for copper and fiber optic lines
▷ Solutions for organizing high-density cross-connects in data centers: Netpodium, VCM
▷ Specialized cable trays for FO lines FGS data centers (FiberGuide System)
▷ Specialized high-density cross-sections for fiber optics: FIST, FACT, OMX
▷ Automated cable infrastructure administration system imVision

CONTEG

CONTEG is a leading European manufacturer of comprehensive infrastructure solutions for data centers, including server rack systems, precision air conditioning systems, intelligent power distribution units, monitoring systems and cable management systems.
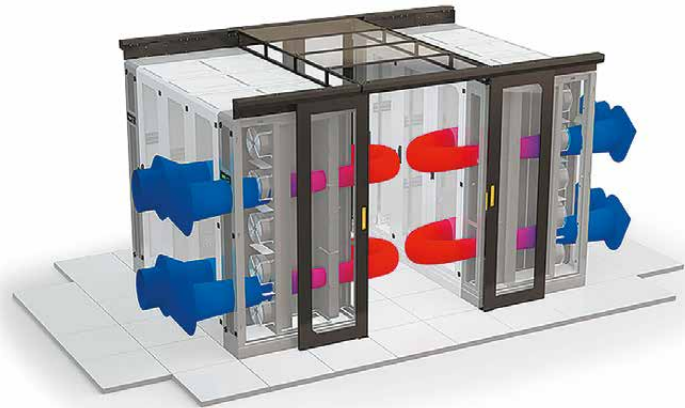

MAIN ACTIVITIES:

▷ Free-standing racks
- PREMIUM SERVER RF1
- PREMIUM HOUSING RB1
- iSEVEN SERVER
- iSEVEN FLEX SERVER (unassembled version)
- iSEVEN RI7 series (universal racks)
- iSEVEN Flex RM7 (unassembled version)
- OPTIMAL CABLE MANAGEMENT (For high-density copper or optical connections)

▷ Open frames
▷ Wall-mount & SOHO racks
▷ Cooling & ventilation
- In-row Units
- Above-rack Units
- In-rack Units
- Room Cooling Units
- Outdoor Units
- Chillers
- Ventilation Units
- Airflow Management

▷ Monitoring & security (several management and control systems)
▷ Cable management
- High Density Wire Management
- Optical Pathway System
- Management of Metallic Cables
- Standart Cable Management
▷ Rack power distribution units (PDUs)

- Complete solutions for outdoor
- Outdoor Cabinets outTEG, WME-O, FSM-O
- Cooling & heating
▷ Complete solutions for industry
- Wall mount WME enclosures
- Free-standing enclosures FSM-X, FSE, FSM, FSM-O
- Cooling & heating

DELTA

Delta is a global provider of power and thermal management solutions. Its mission statement, "To provide innovative, clean and energy-efficient solutions for a better tomorrow," focuses on addressing key environmental issues such as global climate change. As an energy-saving solutions provider with core competencies in power electronics and automation, **Delta's** business categories include Power Electronics, Mobility, Automation, and Infrastructure.

Delta offers some of the most energy efficient power products in the industry, including switching power supplies with efficiency over 90%, telecom power with up to 98%, and PV inverters with up to 99,2% efficiency. We have also developed the world's first server power supply certified as 80 Plus Titanium.

Headquartered in Taiwan, **Delta** regularly invest over 8% of our annual sales revenues in R&D and have worldwide R&D facilities in China, Europe, Japan, Singapore, Thailand, and the U.S.

Delta is a frequent recipient of international awards and related recognition for innovation, design, and continuous dedication to ESG. Since 2011, **Delta** has been listed on the DJSI World Index of Dow Jones Sustainability Indices for 13 consecutive years. **Delta** has also won CDP with double A List for 3 times for its substantial contribution to climate change and water security issues and named Supplier Engagement Leader for its continuous development of a sustainable value chain for 7 consecutive years.

In response to the challenge of climate change, **Delta** will remain committed to the research and development of innovative, energy-saving products, solutions and services that contributing substantially to the sustainable development of mankind.

DELPHIX DATA PLATFORM
DELPHIX DATA MASKING

DIGITUS®
*by*ASSMANN

DIGITUS BY ASSMANN

The German company **ASSMANN** offers its customers a wide range of solutions under the **DIGITUS** brand name. The portfolio includes components for building high-performance copper and fiber-optic structured cabling systems for commercial buildings and data centers, as well as a wide range of peripheral equipment for organizing comfortable and technologically advanced work in a modern office space. The company has been operating in the telecommunications market for over 50 years. Among its customers are organizations of any field of activity around the world – state enterprises, industrial companies, large corporations and individual offices.

MAIN ACTIVITIES:

▷ Equipment for SCS construction
▷ Active network equipment
▷ Uninterruptible power supplies and portable charging stations
▷ Ergonomics of modern office space Digital accessories for PC and home
▷ Equipment and accessories for AV systems
▷ A wide range of power and information cables, adapters, connectors

Dropsuite

DROPSUITE

Dropsuite company specializes in backing up cloud data such as websites, emails. **Dropsuite** products allow you to offer a simple solution for organizing data backup completely based on cloud services. In particular, the Email backup Office 365 product has a convenient integration with the Office 365 service. It will allow you to automate the backup of email and Sharepoint data (including OneDrive) to the **Dropsuite** cloud and, if necessary, not only restore the entire archive, but also find a separate element – a letter or a file from an old archive.

MAIN ACTIVITIES:

OFFICE 365 BACKUP
▹ Office 365 backup
▹ Exchange backup
▹ Sharepoint backup
▹ Onedrive backup
▹ Team sites backup

G SUITE BACKUP
▹ G suite gmail backup

WEBSITE BACKUP

E-MAIL ARCHIVING

IMAP POP BACKUP

e.HOT

e.HOT sealed maintenance-free lead-acid batteries combine high quality and affordable price. One of the main highlights of **e.HOT** batteries – they can be used to power a wide variety of systems and devices. Thus, batteries are used in security alarm systems, uninterruptible power supplies, cycling and motorcycle gear, children's toys, etc. An important feature is the warranty period for batteries, which is 1 year.

MAIN ACTIVITIES:

▷ Replacing the UPS batteries
▷ Surveillance systems power supply
▷ Backup power supply for both a separate segment of the house and the building as a whole
▷ Solar and wind energy storage
▷ Use as batteries for lighting and a wide range of devices

eleveō

ELEVEO

Eleveo is a registered trademark of ZOOM International. ZOOM International is an international company known for its call recording and quality of service management solutions for contact centers and enterprise IP telephony systems.
The company's portfolio includes a number of products for collecting and analyzing various information, recording audio and video conversations, monitoring operator screens in real time, evaluating the work of employees in order to increase their productivity, collect feedback from customers and improve qualifications of agents.

MAIN ACTIVITIES:

- ▷ Performance Analytics contact center data analysis tool
- ▷ Call Recording Solution
- ▷ Video & Telepresence recording solution for video conferences recording
- ▷ Screen Capture employee monitor screen recorder

- ▷ Live Monitoring tool for monitoring operator screens in real time
- ▷ Quality Management solution for evaluating employees work in order to increase their productivity
- ▷ Voice of the Customer a tool for collecting customers feedback
- ▷ E-learning & Coaching a tool for advanced operator training
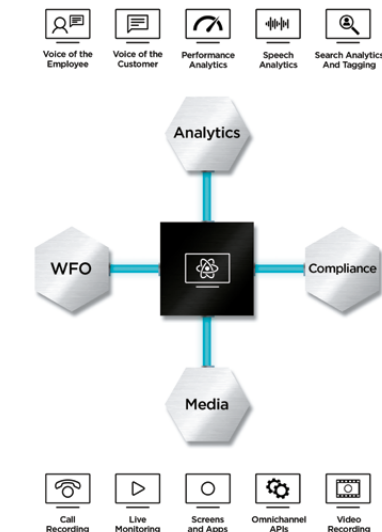

- ▷ Speech Analytics voice call analysis solution
- ▷ Workforce Management contact center scheduling and load balancing solution

ENDER TURING

Ender Turing AI Speech Analytics is a SaaS solution for managing contact center performance and customer experience based on speech analytics. Ender Turing is the easiest-to-value and to-use speech analytics on the European market.

Ender Turing speech analytics integrates with call and chat recording systems, as well as CRM systems to provide end-to-end analytics on the performance of conversations. Analysis of the content of a conversation and checking the final results using AI and ML makes it possible to identify the most productive approaches to communication and, as a result, to sales.

In addition to improving the knowledge and competence of employees, **Ender Turing** detects weaknesses, shortcomings, knowledge gaps – and most importantly for banks and financial institutions – deficiencies in customer verification or company security.

MAIN ACTIVITIES:

▷ Ender Turing Contact Center Performance Management Platform
▷ Speech analytics in 24 languages, a new language can be added in 2 months
▷ AI/ML calls and chats scoring for Quality Management process
▷ Section for call center employees - KPI implementation schedule, a self-learning tool based on the best examples of conversations, records of all conversations and texts, scorecards and assessments
▷ Section for employees of sales departments with text and analytics of all conversations (integration with CRM and transfer of text to CRM is possible)

ENDPOINT PROTECTOR | by CoSoSys
NOW PART OF netwrix
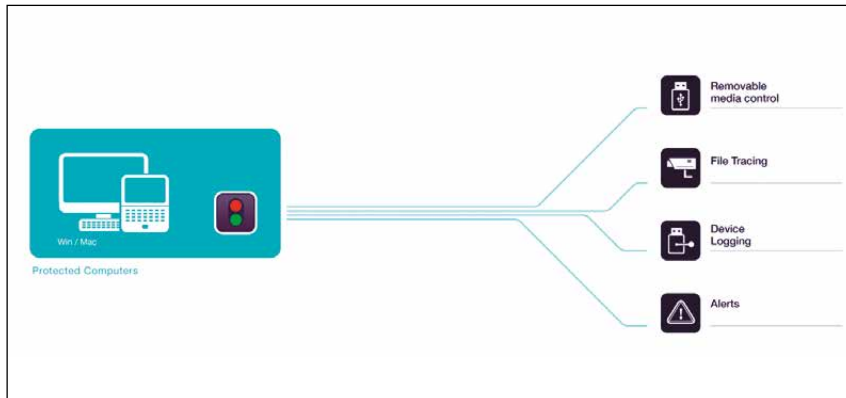

ENDPOINT PROTECTOR BY COSOSYS

CoSoSys S.R.L. is a developer of data protection solutions. **CoSoSys'** key product is **Endpoint Protector**, a comprehensive multiplatform all-in-one DLP solution designed for large, medium, and small enterprises. The system eliminates unintentional data leaks, protects against information theft and malware, and offers control over portable devices and storage devices. **Endpoint Protector** has content filtering capabilities for data at rest and in motion, which are based on dictionaries, regular expressions, and machine learning, as well as profiles for data protection regulations such as GDPR, HIPAA, etc.

MAIN ACTIVITIES:

▷ Protecting information, blocking or allowing file transfers
▷ Scanning of sensitive data
▷ Data encryption during transmission by mail or copying to media
▷ Management of USB devices and peripheral ports
▷ Control and management of mobile devices
▷ Simple cloud-based central management of the entire network

ENGENIUS NETWORKS

EnGenius Networks is a manufacturer of state-of-the-art enterprise network equipment specializing in wireless networks. The company has its own manufacturing facilities in Taiwan, where it also manufactures products for Cisco, Extreme, Ruckus, Fortinet and several others. Attractive pricing policy allows the implementation of high-quality, modern solutions with an optimal price/performance ratio.

MAIN ACTIVITIES:

▸ Access points of corporate level of the Wi-Fi 6 and 7 standard
▸ Switches with PoE++ support and multi-gigabit ports. With continuous power supply. The built-in point controller for access points does not require additional licensing
▸ Free centralized access point management system EzMaster
▸ Free cloud management with analytics and visualization extensions

ESET

ESET is a developer of antivirus software and computer security solutions. The company's portfolio includes security software for corporate and home users. **ESET** also offers business security solutions for workstations – desktops and laptops, smartphones and tablets, including data encryption, network traffic analysis, data leakage prevention, backup and authentication technologies. The products for corporate users include solutions for protecting file and mail servers, Internet gateways, virtual environments and Microsoft SharePoint. In addition, it is worth noting the information cloud service Threat Intelligence, which provides information about targeted attacks, new malware, botnet activities and allows companies to respond to cybersecurity incidents on time.

EXTREME NETWORKS

Extreme Networks offers wired and wireless networking solutions to meet the demands of the modern mobile world, with users and devices constantly moving and virtual machines migrating both inside and outside the data center to the cloud.

Extreme Networks solutions allow you to create and deploy secure software-defined environments (SDN) for both LAN/campus and high-density Wi-Fi networks, as well as for telecom operators, data center networks, with the ability to centrally manage and automate the network, control and isolate access, compliance testing, using advanced technologies such as Extreme Fabric, ExtremeCloud IQ, ML and AI, IoT, Wi-Fi 6E, etc.

MAIN ACTIVITIES:

▷ X-series fixed switches (EXOS) for service providers, corporate markets and data centers
▷ ISW series industrial switches
▷ ERS and VSP series switches for Fabric Networking
▷ SLX series switches and routers for IP Fabric Networking in data center and ISP networks
▷ Universal Hardware Platform – switches with dual-persona capability, allowing you to choose your OS
▷ Extreme Wireless Cloud Enabled Wi-Fi Solutions
▷ Security, control, RTLS and analytics systems for Wi-Fi networks – Extreme Location, Extreme Guest, Extreme AirDefence

▷ Multi-cloud environment management system, deep data analysis, access isolation and control, checking compliance with standards (HIPAA, PCI, GDPR) – XMC (Extreme Management Center)
▷ Cloud-based management and automation system using ML and AI, network access control, checking compliance with standards (HIPAA, PCI, GDPR), ISO 27001 Certified – ExtremeCloud IQ
▷ Network packet brokers and Virtual TAP for analysis and monitoring of network services

FORTINET

For over 20 years, **Fortinet** has been a driving force in the evolution of cybersecurity and networking and security convergence. Our network security solutions are the most deployed, most patented, and among the most validated in the industry. Our broad, complementary portfolio of cybersecurity solutions is built from the ground up with integration and automation in mind, enabling more efficient, self-healing operations and a rapid response to known and unknown threats. The company's portfolio includes products that provide the highest level of information resource security for organizations of all sizes and telecommunications service providers.

MAIN ACTIVITIES:

SECURITY SOLUTIONS

- ▷ FortiGate comprehensive network security
- ▷ SD-WAN system for WAN networks protection and providing secure access to Secure SD-Branch peripherals
- ▷ FortiEDR system of automated protection, detection and response to the endpoints security threats
- ▷ FortiNAC network access control
- ▷ FortiAnalyzer centralized monitoring of events, network activity and reporting

- ▷ FortiSIEM information security event management
- ▷ FortiAP secure wireless networks
- ▷ FortiMail mail server protection
- ▷ FortiManager centralized management of security devices
- ▷ FortiDDoS effective innovative protection against DDoS attacks
- ▷ FortiInsight insider threat detection and prevention with User and Entity Behavior Analysis (UEBA)
- ▷ FortiToken two-factor authentication

- ▷ FortiWeb web applications protection
- ▷ FortiDeceptor external and internal threats identification and response
- ▷ FortiClient end user protection and control
- ▷ FortiADC application delivery controller systems
- ▷ FortiIsolator secure network access with browser isolation
- ▷ FortiSwitch switching
- ▷ FortiSandbox advanced protection against targeted attacks

FS GROUP

FS GROUP is an information security vendor, a key player in the Threat Intelligence market, and a niche player in the global Infosecurity ecosystem. **FS GROUP** is tomorrow's security, from prevention to rapid response and cyber incidents detection:

• more than 8 years of experience in Ukrainian and international markets;

• more than 500 cyber incidents successfully investigated;

• international experience in researching participants' activities and engagement in hacker forums and DarkWeb/DarkNet services, as well as the activities of transnational APT groups and deanonymizing their members.

MAIN ACTIVITIES:

▷ **Platform Blue** is a comprehensive cybersecurity platform that provides access to exclusive data, analytics, and protection tools in a unified solution. It combines powerful intelligence modules such as CrossLink, CrossLink Deep, DeepRadium, DeepTopo, DeepInk, and DeepCobalt. These modules can be used individually or in combination, depending on your business needs, ensuring flexibility and scalability of security measures

▷ **CrossLink** is a unique cyber intelligence platform that allows information security analysts to investigate threat indicators and gather data from a variety of databases and resources. It provides unprecedented visibility into cybercriminal activities by integrating hundreds of thousands of sources – including trillions of telemetry records and billions of underground communications – into a single, intuitive platform

▷ **DeepCobalt** is a leading solution from FS Group for credential protection, specializing in detecting and analyzing compromised accounts through DarkNet monitoring. The product offers real-time updates, notifying users about potential threats related to compromised credentials before they become publicly available

▷ **DeepRadium** is a cybersecurity API solution specifically designed to prioritize and accelerate vulnerability patching. It leverages real-time threat data, allowing organizations to focus on the most critical and actively exploited vulnerabilities, thus enhancing risk management

▷ **DeepInk** is an advanced API for authentication and data leak prevention. It helps organizations identify high-risk users by utilizing trillions of data points for verification. Available through Platform Blue, DeepInk can be seamlessly integrated into existing systems

▷ **DeepTopo** is an IP intelligence tool designed for monitoring and analyzing anonymization methods used by cybercriminals to conceal malicious activities. It includes DarkNet API monitoring, providing accurate, up-to-date, and comprehensive IP analytics collected from criminal and commercial anonymization services. Continuous data updates enable organizations to make informed security decisions based on the latest information, detecting both normal traffic and potential threats in real time

▷ **FS BP Feed** provides threat intelligence feeds with real-time data on potential threats, including malicious IP addresses, domains, and indicators of compromise

▷ **Steal Insight** is a cutting-edge solution from FS Group designed to counter threats from info-stealers. The product detects and analyzes stolen data collected by malicious software, displaying key information through a web interface. This enables organizations to prevent the theft, sale, or disclosure of confidential data on the DarkNet, protecting personal and corporate information from leaks

GENIE NETWORKS

Genie Networks is a leader in traffic analysis and security solutions. With an innovative approach to behavioral traffic analysis (NBA), the company has created a powerful cost-effective solution for collecting and analyzing information, solving problems based on data, and protecting networks from attacks.

Among the company's products, the DPI traffic analyzer, event collection and processing systems, and solutions for traffic management and vulnerability analysis are noteworthy. **Genie Networks** also has experience in integrating its solutions with various network devices and software to ensure maximum efficiency and complexity of the solution.

Genie Networks has a customer base in over 40 countries, including major telecommunications companies, banks, government agencies, and large enterprises.

MAIN ACTIVITIES:

▷ GenieATM – In-Depth Traffic Analysis and Instant DDoS Protection

▷ GenieATM FLB – Run Your Network Analytics and Security Solutions More Efficiently with Flow Load Balancer

▷ GenieATM MSP Server – The One-Stop Managed Service Platform to Enhance Revenue for Service Providers

▷ GenieATM Traffic Optimizer – Network Optimization Driven by Smart Traffic Visibility

▷ GenieATM Visual Portal – Intuitive, At-a-glance Data Visualizations Tailored to Your Network Demands

▷ GenieAnalytics – Smart Network Traffic Exploration by Big Data-Powered Analytics

▷ GenieAnalytics Deep Trace – End-to-End Traffic Intelligence from OTT Service, Delivery Network, to Subscriber Identity

GRANDSTREAM NETWORKS

Grandstream has been connecting the world since 2002 with unified communications and networking solutions that make communicating more impactful than ever before. Their award-winning solutions provide everything needed to build a seamless, easy-to-manage communication platform, offering a one-stop-shop for all networking, unified communications, collaboration, and physical security solutions.

In 2015, from the VoIP telephony world, the company successfully entered the video conferencing market, introducing innovative video conference servers, video terminals, and IpVideoTalk Cloud service.

In 2017, **Grandstream** launched the GWN Wi-Fi solution followed by the successful IP network equipment line in 2022, which includes switches and Wi-Fi routers.

MAIN ACTIVITIES:

VOICE AND VIDEO IP TELEPHONY
▷ IP telephone exchanges
▷ IP phones
▷ Wi-Fi phones
▷ IP video phones
▷ Analog access gateways
▷ E1 gateways

VIDEOCONFERENCING SYSTEMS
▷ Video conference server
▷ Video terminals
▷ Cloud service IpVideoTalk

NETWORKING SOLUTIONS
▷ Wi-Fi Access Points
▷ Network Switches
▷ WI-FI Routers

GTB TECHNOLOGIES

For years, **GTB Technologies** has been at the forefront of the data loss prevention (DLP) industry, consistently earning top marks in Gartner's DLP Reviews. **GTB Technologies** has proven its ability to deliver comprehensive and innovative solutions that protect businesses from unauthorized data exposure.

GTB's patented technology enables the detection of sensitive data across various platforms, both on-premises and in the cloud. The company's flagship product, the GTB Inspector, offers unparalleled accuracy in identifying and classifying sensitive information, allowing organizations to secure their data more effectively.

With a strong commitment to customer satisfaction, **GTB Technologies** continues to stay ahead of the competition, solidifying its place as an industry leader in data loss prevention. By continually enhancing its products and services, GTB ensures that its clients remain well-protected against data breaches and other security threats.
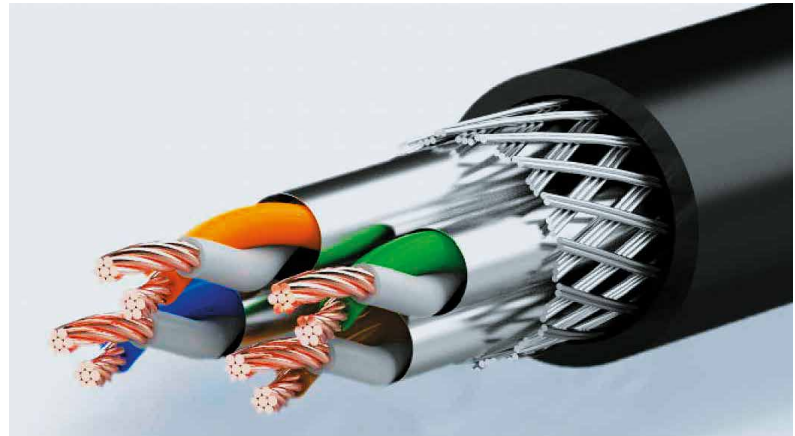

MAIN ACTIVITIES:

▷ **Data Loss Prevention** (DLP) is a Content-Aware Reverse firewall that inspects, classifies, and analyzes all types of outbound and inbound data transmissions in real-time, including OCR detection, cloud, and email DLP

▷ **Endpoint Protector** provides real-time document fingerprinting detection for data in use and includes features such as DLP, UBA, ITM with OCR and fingerprints, Email DLP, wireless control, OCR, social media, and application control for platforms like BOX, Dropbox and others

▷ **Data Discovery, Classification, Watermarking, and OCR** in real-time can automatically discover, locate, identify, classify, and inventory your critical data including Exchange, PST/OST, NAS, SharePoint, fileshares, Local Storage, Cloud Storage (Google, Dropbox, OneDrive), including OCR detection

▷ **Content-Aware Digital Rights Management** provides comprehensive access control for internal and external users to sensitive data

▷ **Cloud Security and Application Control**, enables you to control data from various sources such as laptops, database exchanges, all cloud services, including AWS, Amazon Cloud, Azure, Evernote, Google Workspace, Office 365, and more apps from shadow IT

HES Cabling Systems
Connecting Networks™
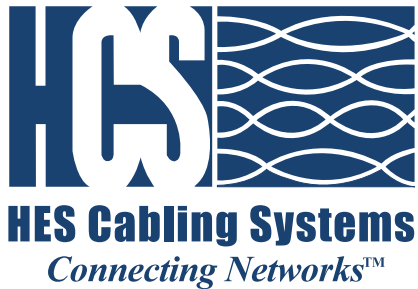

HCS CABLING SYSTEMS

HCS Cabling Systems specializes in the development of data cables for SCS. The company's products are made to build reliable and durable cabling systems backed by the **HCS Century Lifetime Warranty**, covering both components and network performance. **HCS Cabling Systems** provides a full range of technical solutions from which customers can choose the right ones for their specific needs while obtaining the best value for money.

The **HCS Cabling Systems** portfolio includes network cabling solutions based on innovative voice, video and data transmission products, a wide range of copper and fiber optic UTP, FTP, SFTP and S-STP products, including backbone and horizontal cables, switching cords, connecting equipment and other products. All components are designed and manufactured in full compliance with all international industry standards.

MAIN ACTIVITIES:

▷ CAT copper cabling solutions. 5e, 6, 6A, 7
▷ OM3, OM4, OS2 Fiber optic cable solutions
▷ Copper and fiber solutions for data centers
▷ 19" Cabinets and racks
▷ Phy-FiXX Copper and Fiber Managed Cabling Solutions
▷ Tools and accessories for cable communication systems installation

H3C

H3C is a leader in the digital solutions industry with over 30 years of experience, committed to delivering innovative and reliable solutions for its partners. Its own research centers and production facilities allow it to combine all its goals and developments together. The company offers an extensive portfolio of digital infrastructure products, including but not limited to servers, network solutions, security, which create a universal platform for cloud computing, Big Data, AI, 5G, IoT, and end-to-end technical solutions. **H3C** is also the exclusive supplier and partner of HPE solutions in China.

MAIN ACTIVITIES:

SERVER SYSTEMS
▷ UniServer rack servers based on Intel or AMD architecture
▷ High density blade chassis

NETWORK SOLUTIONS
▷ Routers from office MSRs to ISP Backbones, including virtual systems
▷ Data center switches 100/40/25/10 Gbps based on Comware OS
▷ Switches 1/10 Gbit/s access and industrial series with flexible functionality
▷ Wireless access points Wi-Fi 6/7 for various environments and IoT capabilities
▷ NGFW firewall security with layer 2–7 protection and performance levels up to Carrier Grade

CONVERGENT SYSTEMS
▷ All-in-one UIS-Cell HCI systems for expanding Infrastructure as a Service and virtualization environments

SOFTWARE SOLUTIONS
▷ Own hypervisor CAS (Cloud Automation System)
▷ Centralized management iMC (intelligent Management Center) with support for multiple manufacturers
▷ Controllers for the implementation of the SDN network

CLOUD SERVICES
▷ Platform for deploying applications and services H3C CloudOS, full-stack cloud platform
▷ H3C Oasis for H3C infrastructure management

HCL TECHNOLOGIES

HCL Technologies helps businesses reimagine their business in the digital age. The company offers an integrated portfolio of products and services that includes solutions for hybrid cloud, software-defined networking and digital workspaces, engineering services and solutions, and software products for enterprise customers that meet their specific industry requirements.

MAIN ACTIVITIES:

▷ HCL Notes/Domino Client and server software for messaging and collaboration

▷ HCL Domino Volt Business Application Development Solution

▷ HCL Connections Social software platform

▷ HCL Commerce Modern digital trading platform

▷ HCL Security AppScan Standard – a tool for testing applications and web applications for vulnerabilities

▷ HCL BigFix Platform for joint management of endpoints, mobile devices and security

▷ HCL Unica Marketing Campaign Tool

▷ HCL Digital Experience Platform

▷ HCL Sametime online communications solution

▷ HCL Verse Email client with analytics and collaboration capabilities

Hewlett Packard Enterprise

HEWLETT PACKARD ENTERPRISE

HPE is one of the world leaders in hardware and software for the corporate market segment. **HPE** continues to actively develop its product lines and solutions in this segment. The **HPE** product portfolio includes software and hardware systems, server solutions for data centers, data storage systems, network equipment, network protection and security equipment, software, and services that make working in the IT environment as convenient and manageable as possible.

MAIN ACTIVITIES:

COMPUTE

▷ Our Compute portfolio offers both general purpose servers for multi-workload computing and workload optimized servers which offer the best performance and value for demanding applications. This portfolio of products includes our secure and versatile HPE ProLiant rack and tower servers; and HPE Synergy, a composable infrastructure for traditional and cloud-native applications. HPE ProLiant servers are the compute foundation for the fastest growing workloads in the industry including AI Inferencing, hyperconverged infrastructure ("HCI"), virtual workspaces ("VDI"), and data management. Compute offerings also include operational and support services and HPE GreenLake for Compute. HPE GreenLake for Compute provides flexible Compute as-a-service IT infrastructure on a consumption basis through the HPE GreenLake edge-to-cloud platform

HPC & AI

▷ Our HPC & AI business offers integrated systems comprised of software and hardware designed to address High Performance Compute ("HPC"), Artificial Intelligence ("AI"), Data Analytics, and Transaction Processing workloads for government and commercial customers globally

▷ Our solutions are segmented into the following categories: HPC and Data Solutions. The HPC portfolio of products includes HPE Cray EX, HPE Cray XD (formerly known as HPE Apollo), and Converged Edge Systems (formerly known as Edge Compute) hardware, software, and data management appliances that are often sold as supercomputing systems, including exascale supercomputers (systems that can process 1018 floating point calculations per second), that support data-intensive simulations and large-scale AI applications. The Data Solutions portfolio includes the mission critical compute portfolio and HPE NonStop. The mission critical compute portfolio includes the HPE Superdome Flex and HPE Integrity product lines for critical applications, including large enterprise software applications and data analytics platforms. The HPE NonStop portfolio includes high-availability, fault-tolerant software and appliances that power applications, such as credit card transaction processing that require large scale and high availability. As part of our systems are aligned to the convergence of HPC and AI-at-scale across our industry, HPE offers a suite of software products, including AI-powered technologies designed to play a critical role in turning data into readily available, actionable information to fuel growth and innovation for our customers. Our solutions are focused on enabling customers to develop and deploy AI models, such as Large Language Models ("LLMs") across training, tuning, and inferencing. These include a software stack needed to prepare

data for AI models and then to train those AI models using our open-source machine learning platform

▷ HPC & AI offerings also include operational and support services, whether sold with our systems or as standalone services. We also offer most of our solutions as-a-service through the HPE GreenLake edge-to-cloud platform, including HPE GreenLake for LLMs. With offerings that are AI-driven and built for hybrid cloud environments with HPE GreenLake consumption models, we provide the right workload optimized destinations for data and insights development for our customers

STORAGE

▷ HPE Storage is transforming the customer experience with storage as-a-service and cloud data services through the HPE GreenLake edge-to-cloud platform and data infrastructure to enable customers to simplify IT and unlock greater levels of agility with a cloud operational experience. The customer experience transformation also includes AI and data-driven intelligence with HPE InfoSight and HPE CloudPhysics. Customers can store and serve their data with speed and high availability to applications, secure and protect their data across hybrid clouds from

ransomware and cyber threats, and gain data mobility across private cloud, public cloud, and multi-cloud environments

▷ Storage provides data storage and data management offerings, which include cloud-native primary storage with the HPE Alletra Storage portfolio, self-service private cloud on-demand with HPE GreenLake for Private Cloud Business Edition; data storage and data management services with HPE GreenLake for Block Storage, and HPE GreenLake for File Storage; disaster recovery and ransomware recovery with Zerto; data protection services with HPE GreenLake for Backup and Recovery; and big data solutions running on the family of HPE Alletra 4000 Data Storage Servers. Storage also provides solutions for unstructured data and analytics workloads, along with traditional tape, disk products, and storage networking. Storage also provides data driven intelligence with HPE InfoSight and HPE CloudPhysics, along with operational and support services and data management solutions delivered through the HPE GreenLake edge-to-cloud platform

INTELLIGENT EDGE

▷ The Intelligent Edge business is comprised of a portfolio of secure edge-to-cloud solutions operating under the Aruba brand that include wired and wireless local area network ("LAN"), campus and data center switching, software-defined wide area networking, network security, and associated services to enable secure connectivity for businesses of any size. The primary business drivers for Intelligent Edge solutions are work from anywhere environments, mobility, and internet-of-things ("IoT") devices. The insights from data generated at the edge are key to driving new business outcomes and experiences

▷ The HPE Aruba Networking product portfolio includes hardware products, such as Wi-Fi access points, switches, and gateways. The HPE Aruba Networking software and services portfolio includes cloud-based management, network management, network access control, software-defined wide-area networking, network security, analytics and assurance, location services software, and professional and support services, as well as aaS and consumption models through the HPE GreenLake edge-to-cloud platform for the Intelligent Edge portfolio of products

▷ We also offer Aruba ESP (Edge Services Platform), which takes a cloud-native approach to helping customers meet their connectivity, security, and financial requirements across campus, branch, data center, and remote worker environments, covering all aspects of wired, wireless LAN, and wide area networking

HIRSCH

HIRSCH

Hirsch, Inc. is a developer of security and identification solutions. The Identiv portfolio includes solutions for physical and logical access control, video analytics and data analytics, contact and contactless smart card readers and reader modules, and RFID-enabled applications. The company's products allow you to protect the entire range of company assets: from the network perimeter to desktop access and from physical objects to IoT devices.

Hirsch solutions are used in a wide range of industries: government, corporate, consumer, education, healthcare, banking, retail and transportation. The company's products are manufactured in a manner consistent with the efficient use of resources and materials, including the protection and preservation of the natural environment.

MAIN ACTIVITIES:

PHYSICAL ACCESS AND VIDEO CONTROL
▷ Access Control as a Service (ACaaS)
▷ Hardware
  • Hirsch hardware
  • physical access readers
▷ Software
  • Hirsch Velocity Software
  • Identiv Connected Physical Access Manager (ICPAM)
▷ Software-Driven Architecture
  • Freedom Access Control
  • Liberty Access Control
▷ Integrated Systems
▷ Telephone entry systems
  • Enterphone Cube

• Enterphone iQ
• Enterphone 19
• Enterphone iQ
• Enterphone™ Kiosk
▷ Video and data analytics

LOGICAL ACCESS CONTROL
▷ Smart Card Readers
  • contact

• contactless
• mobile
▷ uTrust tokens
▷ Applications
▷ OEM modules

RFID AND NFC SOLUTIONS

HITACHI
Inspire the Next

HITACHI VANTARA

Hitachi Vantara offers advanced solutions for data storage and processing, supporting the digital transformation of businesses. The company's products are designed for virtualization, automation, hybrid, and cloud environments, with support for all types of data. **Hitachi Vantara** provides solutions that help businesses reduce infrastructure costs while increasing flexibility and performance.

MAIN ACTIVITIES:

STORAGE SYSTEMS
- Midrange/High-End classes
- Hybrid storage systems based on SAS, Flash, and NVMe technologies
- VSP One File network storage solution
- Virtual Tape Libraries (VTL)

CONTENT MANAGEMENT SOFTWARE AND SOLUTIONS
- Hitachi OpsCenter software
- Hitachi Data Protection Suite for backup and recovery solutions
- Hitachi Content Platform (HCP) – a distributed object storage solution for large volumes of unstructured data

CONVERGED SOLUTIONS AND CLOUD TECHNOLOGIES
- Cisco and Hitachi Adaptive Intelligent Solutions for converged infrastructure
- Converged Unified Compute Platform for workloads requiring high fault tolerance and flexibility
- Hitachi Unified Compute Platform HC based on VMware vSAN
- Unified Compute Platform RS — a software-defined platform for hybrid cloud solutions
- Unified Compute Platform Advisor — a tool for IT infrastructure automation and management

NEXT-GENERATION SOLUTIONS
- Hitachi IQ. A solution designed to enable intelligent data processing and analytics for a variety of industries. Hitachi IQ simplifies the management and analysis of large data sets, offering actionable insights and efficient decision-making. Part of Hitachi's End-to-End Solutions Stack for Enterprise AI/ML Workloads, it leverages NVIDIA DGX systems and Hitachi Content Software for File to provide scalable, high-performance infrastructure for AI/ML applications, accelerating initiatives such as customer service, financial reporting, and edge inference

MUK
Classics of distribution

HUAWEI

Huawei is a leading global information and communication solutions provider. Thanks to innovative developments focused on customer needs and a developed partner network, the company has achieved high results in the development of telecommunications networks, terminals and cloud computing systems. **Huawei** creates the most favorable conditions for operators, enterprises and end users by providing them with competitive solutions and services.

MAIN ACTIVITIES:

STORAGE SYSTEMS
▷ All Flash
▷ Hybrid
▷ Distributed

NETWORK SOLUTIONS
▷ Network security systems
▷ Routing
▷ Wireless Wi-Fi solutions
▷ Switching
▷ Solutions and software for implementing SDN/SD-WAN
▷ IoT

OPERATOR SOLUTIONS FOR DATA TRANSMISSION
▷ WDM transport
▷ Implementation of PON technologies
▷ Radio relay transport

SERVER INFRASTRUCTURE
▷ Cabinets
▷ Cooling
▷ Management
▷ Modular data centers

ALL-IN-ONE FUSIONCUBE SOLUTIONS
▷ Storage Systems
▷ Switching
▷ UPS and service in one box

ENTERPRISE VIDEO CONFERENCING SOLUTIONS

**VIDEO SURVEILLANCE WITH DEVELOPED SOFTWARE**

INFORTREND

Taiwanese company **Infortrend** has been present in the global data storage market for over 20 years and has established itself as a reliable supplier of solutions with an optimal balance of price and performance. Analytical company Gartner has recognized Infortrend as a niche player, noting the manufacturer's commitment to solving complex customer problems with maximum efficiency.

Infortrend offers products that clearly distinguish it in the storage systems market. Infortrend storage systems are compatible with Nakivo, Commvault and Veeam products – leaders in the field of data backup. They are certified to work with key virtualization platforms Microsoft Hyper-V, VMware, Oracle, and support integration with cloud services of Amazon, Microsoft Azure, OpenStack Swift and Google Cloud. Infortrend solutions are focused on quality, reliability, flexibility in configuration and reasonable cost.

MAIN ACTIVITIES:

- Scale-out NAS systems
- Unified All Flash storage systems
- Hybrid cloud storage systems
- Unified storage systems (SAN/NAS/cloud)
- SAN storage systems
- Server storage systems
- Storage systems for Artificial Intelligence Applications
- Expansion enclosures in various form factors
- Software

IBM
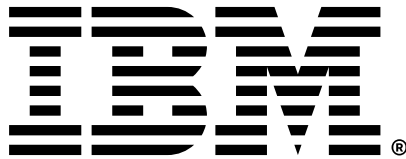

Distributor

IBM

IBM Corporation is one of the world's largest providers of IT solutions. The company has two key divisions:

- production of servers and data storage systems;
- software development.

MAIN ACTIVITIES:

COMPUTING POWER SERVERS
- ▷ SystemZ, LinuxOne – MainFrame
- ▷ Power Systems

STORAGE SYSTEMS
- ▷ Disk systems
  - entry level: FlashSystem 5015, 5045
  - midrange level: FlashSystem 5300, 7300
  - enterprise level: FlashSystem 9500
- ▷ Tape Systems/Virtual Tape Libraries
  - entry level (TS2900)
  - midrange level (TS4300)
  - enterprise level (TS4500)
- ▷ Storage Area Networks (SAN)
- ▷ To work with MainFrame: IBM DS8900F

SOFTWARE
- ▷ With Watson, you can analyze and interpret any data, including unstructured text, images, audio and video materials
- ▷ Data processing tools, data warehousing and large datasets analysis platforms
- ▷ Application and data integration via API
- ▷ Comprehensive security solutions
- ▷ Infrastructure, applications, processes and cloud environments managing tools
- ▷ Specialized industry software (business solutions)

- ▷ A family of IBM Cloud Paks solutions are easy-to-use, fully modular solutions that bring AI applications, data, and services together using container software solutions

MUK
Classics of distribution

IDEMIA

IDEMIA specializes in biometrics, identity verification and digital security. When developing solutions, the company relies on natural, reliable, and persistent features for identity verification: the body's own biometric data, including face, iris, and fingerprints. **IDEMIA** uses proven artificial intelligence (AI) and deep learning algorithms in its products to improve the performance of biometric identification and authentication.

MAIN ACTIVITIES:

BIOMETRIC READERS

i*Guana*

IGUANA

iGuana offers end-to-end solutions for electronic document management and digital archiving. **iGuana's** complete suite of solutions and services includes electronic document management systems (EDMS), document and archive digitization, document archiving, and professional equipment for digitizing and cataloging a wide range of source materials: from simple files and photo albums to complete collections, ancient folios, atlases, maps and negatives on glass. **iGuana's** solutions are used by libraries, archives, cadastral offices, museums, universities and private organizations in a number of countries around the world.
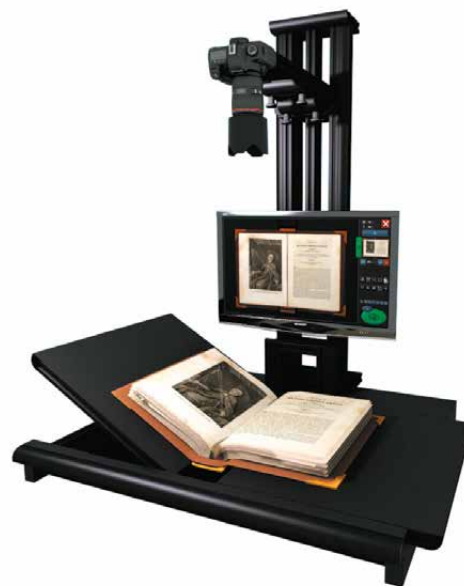

MAIN ACTIVITIES:

PROFESSIONAL DIGITIZATION OF DOCUMENTS
- ▷ Book (planetary) scanners
- ▷ Microfilm scanners
- ▷ Microfiche scanners
- ▷ Document scanners
- ▷ Art scanners
- ▷ Scanners for cartographic materials
- ▷ Microfilming equipment
- ▷ Specialized software and EDMS

Image Access

IMAGE ACCESS

Image Access is a developer and supplier of advanced scanners and software products for digitizing printed documents. The company offers its products in all segments of digital printing.

The portfolio includes projection, flatbed, sheetfed and duplex scanners, combining state-of-the-art hardware solutions and embedded software to scan images at high resolution and unmatched speed.

MAIN ACTIVITIES:

▷ Book scanners
▷ Large format scanners
▷ Art scanners
▷ Flatbed scanners

INFINIDAT

INFINIDAT

Infinidat is a US-Israeli company that produces storage solutions for critical corporate data with the highest performance requirements and seven nines reliability. Gartner analyst firm positions **Infinidat** as an industry leader in the PrimaryStorage segment, citing that **Infinidat** consistently gets a high customer satisfaction rating due to stable firmware, easy management, overall performance, and the "all-inclusive" principle.

MAIN ACTIVITIES:

- ▷ InfiniBox enterprise-class storage system
- ▷ InfiniGuard solution for data backup and recovery
- ▷ InfiniSync solution for data loss prevention
- ▷ Cloud solution Neutrix Cloud

INFOCUS

InFocus is an industry pioneer and world market leader in visual communication market. Its digital displays turn bright ideas into brilliant results everywhere people come together to collaborate – in meetings, presentations, classrooms and offices around the world. With over 20 years of experience and innovation in visual collaboration technologies, **Focus** is dedicated to helping people communicate, collaborate, create, and be more effective every day.

MAIN ACTIVITIES:

PROJECTORS
- Ultra-portable
- Short throw
- For office and education
- Installation
- For home theater
- Full HD

INTERACTIVE LCD DISPLAYS
- Mondopad
- iTouch

JUPITER VIDEO WALL CONTROLLERS
- C-Series
- Catalyst
- Canvas
- PixelNet

JABRA

Jabra, part of the GN Group, is a leader in intelligent audio and video collaboration solutions designed to empower users and businesses. **Jabra's** unique audio research expertise is at the core of all Jabra developments, so solutions are built around the best technologies for voice communication. This allows the company to create solutions for offices and contact centers that help professionals work more productively from anywhere, as well as wireless headsets and headphones so that users can enjoy communication, music and multimedia. GN Group makes life sound better and is listed on Nasdaq Copenhagen.

MAIN ACTIVITIES:

HEADSETS
▷ Office headsets
▷ Contact center headsets
▷ Headsets for calls and music
▷ Bluetooth mono headsets
▷ Wireless headphones

OFFICE SPEAKERPHONES
▷ Jabra Speak
▷ Jabra Speak 2

VIDEOCONFERENCING
▷ PanaCast 50
▷ PanaCast 20
▷ PanaCast
▷ Panacast room system (certified for MS Teams Rooms or Zoom Rooms)

JIANGSU UNITED POWER FRIEND TECHNOLOGY

Jiangsu United Power Friend Technology specializes in the design and manufacture of generator sets. The company's solution portfolio includes open and silent type diesel, gasoline, gas generator sets, container generators, automobile generators, ship generators, etc. **Jiangsu United Power Friend Technology** products are highly reliable, have long service life and are used in various industries.

MAIN ACTIVITIES:

- Diesel generators
- Silent generators
- Portable generators
- Marine diesel generators
- High power diesel generators

- Iveco diesel generators
- Cummins diesel generators
- Perkins diesel generators
- Yanmar diesel generators
- Lovol generators

- Deutz generators
- Mobile lighting towers
- Brushless generators
- High performance diesel engines
- Gas generators

JUNIPER NETWORKS

Juniper Networks specializes in innovative networking solutions, from individual devices to data centers, from end-users to cloud service providers, redefining network functionality and cost-effectiveness.

Juniper Networks takes an experience-first networking approach, embedding real AI into all our products to deliver better end user and operator experiences. **Juniper's** AI-Native Networking Platform assures that every connection is reliable, measurable, and secure for every device, user, application, and asset. The Junos operating system runs across all **Juniper** routing, switching, and security infrastructure, as well as on whitebox hardware, for a consistent Junos OS experience end to end.

MAIN ACTIVITIES:

SWITCHES
▷ EX Series
▷ QFX Series

ROUTERS
▷ MX Series
▷ ACX Series
▷ PTX Series
▷ NFX Series
▷ SSR Series
▷ JRR200

SECURITY
▷ SRX Series

▷ vSRX Series
▷ cSRX Series
▷ ATP

MIST AI AND CLOUD SERVICES
▷ Mist Wireless Assurance
▷ Routing Enterprise Assurance
▷ Mist Wired Assurance
▷ Mist WAN Assurance
▷ Marvis AI-Native virtual network assistant
 ▷ Mist Premium Analytics
  ▷ User Engagement

▷ Asset Visibility
▷ Mist IoT Assurance
▷ Mist Access Assurance
▷ Marvis Minis
▷ Marvis VNA for data center

NETWORK AUTOMATION AND ORCHESTRATION
▷ Paragon Automation
▷ Apstra
▷ Junos Space

WIRELESS NETWORKS
▷ Mist Cloud Architecture and Mist AI
▷ Access Points

KEENETIC

KEENETIC

The new generation of **Keenetic** routers offers features such as Internet connection redundancy, accelerated tunneling protocols, online updates and component-wise assembly of the operating system. Dozens of new software features and improvements are released every year: a mobile application, own cloud platforms and a domain name service are created. **Keenetic** became the first devices in the world to integrate Internet filters. Among other Internet filters, AdGuard ad blocker, Cloudflare DNS are also available. **Keenetic** routers also support installing thousands of Entware and Debian packages out of the box.

In addition to the generally accepted security mechanisms, **Keenetic** has added support for the new WPA3-PSK, OWE, WPA/WPA2/WPA3-Enterprise and WPA3-192 Enterprise security algorithms for the Wi-Fi wireless network. All **Keenetic** models implement both VPN clients/servers for secure access (PPTP, L2TP over IPSec, IKEv2, Wireguard, OpenVPN, SSTP) and for network tunneling (Site-to-Site IPSec, EoIP (Ethernet over IP) , GRE, IPIP (IP over IP)).

Recently, **Keenetic** multi-port Gigabit models, devices with built-in LTE modems, and Wi-Fi 6 devices supporting the IEEE 802.11 ax standard are also available.

MAIN ACTIVITIES:

▷ Solutions for Internet access using any of the current methods (Ethernet, xDSL, Wi-Fi, 3G/4G connection via USB modem, PON terminal)
▷ Internet Connection Reservation Solutions
▷ Detailed local network control
▷ Solutions for "smart home" and IoT on the Keenetic platform
▷ Keenetic mobile application for remote control of routers via the Internet
▷ Free KeenDNS service

MUK
Classics of distribution

KINGSTON

Kingston Technology is the world's largest independent manufacturer of memory products for private, commercial and government use. High-performance DRAM, ultra-secure memory cards, USB and flash drives, and other innovative company devices are widely used by private consumers and Hollywood professionals, big data processors and information security specialists on 6 continents.
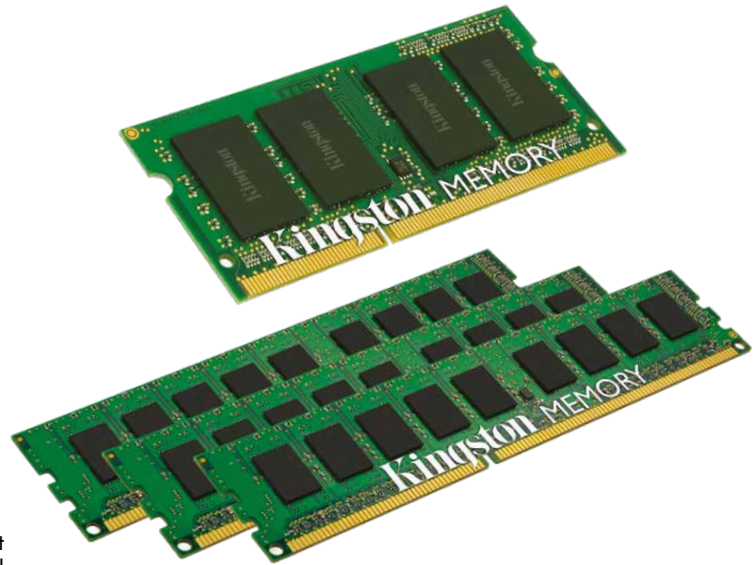

MAIN ACTIVITIES:

▷ RAM
▷ SSD
▷ Memory cards

▷ USB drives
▷ Embedded memory devices, including eMMC and DRAM components

KOFAX
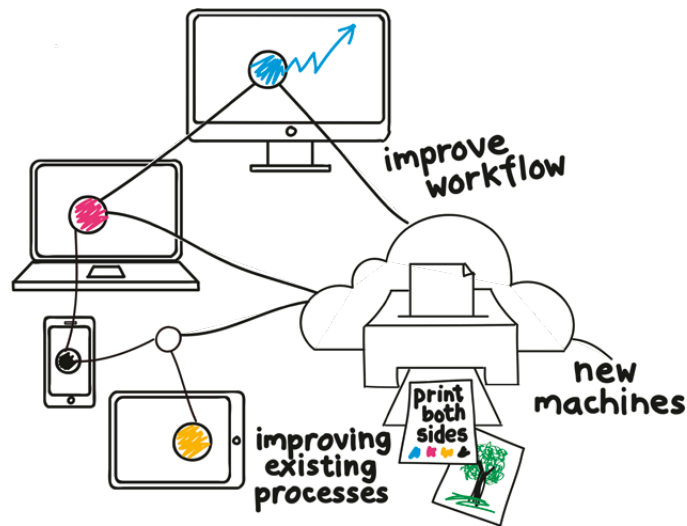

KOFAX

Kofax develops solutions to scanning, recognizing, processing and sharing critical information. **Kofax** solutions extract relevant data from paper, fax, and electronic sources and transform documents into the desired format. **Kofax's** intelligent automation platform helps organizations transform intensive business processes, reduce manual work and errors, minimize costs, and improve customer engagement. **Kofax** solutions combine RPA, cognitive capture, process management, mobility, collaboration, and analytics capabilities to simplify implementation and deliver great results.

MAIN ACTIVITIES:

- TotalAgility
- InvoiceAgility
- Printix
- Power PDF
- RPA
- e-Invoice Network
- ControlSuite
- OmniPage

legrand ®

LEGRAND

Legrand is a leading manufacturer and supplier of integrated solutions for electrical and information systems of buildings. Legrand products are used in residential construction and the industrial and administrative sectors. **Legrand's** leadership is due to several factors, including a high production culture and large-scale investments in the research and development of new technologies.

The development of each **Legrand** product is carried out considering the most advanced solutions, and each product meets the highest requirements of European quality.

MAIN ACTIVITIES:

POWER DISTRIBUTION
▷ Power circuit breakers
▷ DIN rail mounting modular hardware
▷ Switch disconnectors, contactors, motor protection
▷ Low voltage cabinets and shields
▷ Control, measurement and management equipment
▷ Transformers and busbars
▷ Electric vehicles charging solutions

INFORMATION NETWORK
▷ LCS3 structured cabling systems for office buildings and data centers
▷ 19″ cabinets and racks for equipment placement in the data center
▷ Air conditioning systems for data centers
▷ iPDUs with control and monitoring function

POWER SUPPLY PROTECTION
▷ KEOR PDU series Redundant 1-phase UPS
▷ KEOR Multiplug, KEOR SPX, KEOR SP, NIKY S, KEOR LINE RT series line-interactive 1-phase UPS
▷ KEOR LP, KEOR S, Daker DK PUS series 1-phase online double conversion UPS
▷ MEGALINE series 1-phase modular online double conversion UPS
▷ KEOR T EVO, KEOR T, KEOR HPE, KEOR HP series 3-phase double conversion online UPS
▷ TRIMOD HE, ARCHIMOD HE, KEOR MOD series 3-phase double conversion modular online UPS

WORKPLACE ORGANIZATION
▷ Mosaic series wiring accessories
▷ Mini-trunking DLPlus and cable channels DLP
▷ Columns, floor boxes, desktop multi-outlet extensions

Lenovo™

LENOVO

Lenovo has vast industry experience, always actively investing in R&D, and expanding its product line. When choosing enterprise-class solutions, bet on **Lenovo** products.

MAIN ACTIVITIES:

SERVERS
▷ Rack servers
▷ Tower servers
▷ Edge Servers
▷ Blade servers
▷ Mission Critical Servers
▷ High-Density servers
▷ Additional components for servers

STORAGE SYSTEMS
▷ Unified storage
▷ Storage-Area Network

LEVITON

LEVITON

Leviton Network Solutions is a single-source global manufacturer of copper and fiber cabling systems. **Leviton** solutions are used in data centers, businesses, schools, hospitals, government facilities and commercial mixed-use markets around the world.

MAIN ACTIVITIES:

▷ Copper systems
▷ Fiber systems
▷ Data centers
▷ Industrial networking

LG ELECTRONICS

LG Electronics is a technology pioneer that has become the global brand of the future through innovation and continuous growth. The company was founded in 1958 and has since blazed a trail into the digital age by applying technological expertise gained from various consumer devices such as radios and televisions.

LG Electronics offers a variety of products, applying new technologies in mobile devices and digital TVs, and continues to strengthen its status as a global company.

MAIN ACTIVITIES:

- Hotel TVs
- Hotel servers
- SAC/CAC/VRF/MULTI V
- LED digital screens
- Video screens 24/7

MICROSOFT

Microsoft Corporation is a world leader in producing software, providing services and developing Internet technologies for personal computers and servers. The MUK group of companies, as an authorized distributor of **Microsoft**, provides partners with the opportunity to get acquainted with the functionality of products and test solutions based on their own demo laboratory, offers advice from certified technical and licensed specialists, and provides an assessment of the level of maturity of software asset management processes.

PRODUCT LINE:

MODERN WORKPLACE

▷ Teamwork
  • Microsoft Exchange corporate e-mail
  • Microsoft Teams communications, calls and messages
  • Microsoft SharePoint online portal of the enterprise with workflow elements
  • Microsoft 365 and Office 365
  • Microsoft Project Teams collaboration and project management systems
  • MUK cloud services based on Microsoft 365 and Office 365
▷ Simple and secure platform
  • Windows 11
▷ Data protection + user, device, app and service management
  • Enterprise Mobility and Security

BUSINESS APPS

▷ Process and Function Automation
  • Microsoft 365 + Dynamics 365 + LinkedIn

  • Power Platform automation of business-critical functions, including sales management, staffing capabilities, operations, customer service, sales agents management

APPLICATIONS AND IT INFRASTRUCTURE

▷ Distributed hybrid cloud infrastructu
  • Microsoft Azure core services
  • MUK cloud services based on Microsoft Azure
  • Azure Backup and File Storage
  • Windows Server platforms
  • SQL Server database management systems
  • Disaster Recovery
  • Application Hosting and Management
▷ Control systems
  • Microsoft System Center Configuration Manager, IT

infrastructure change and configuration management system
  • Microsoft System Center Operations Manager, a comprehensive tool for monitoring corporate IT infrastructure
  • Microsoft System Center Virtual Machine Manager, virtual environment management system
  • Microsoft System Center Service Manager, services and systems change and lifecycle management system
  • Microsoft System Center Data Protection Manager, backup and recovery system
▷ Development tools
  • Microsoft Visual Studio
  • Microsoft Team Foundation Server

DATA MANAGEMENT AND ARTIFICIAL INTELLIGENCE

▷ Big data
  • business intelligence with Microsoft Azure + Power BI

▷ Azure Machine Learning
  • forecasting
  • Computer Vision
  • speech recognition and generation
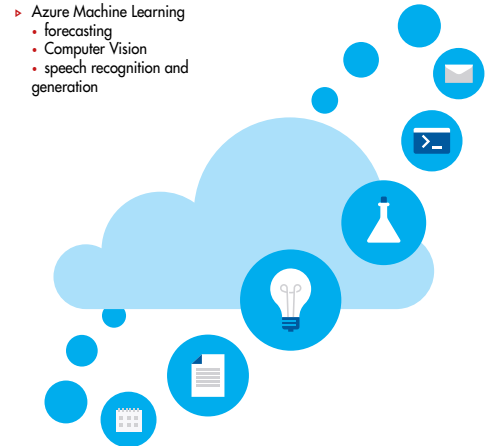

MICROSOFT

Microsoft Corporation is a leading provider of cloud services. The company provides the ability to use services to solve business problems, develop, run applications and store data on servers located in distributed data centers. At the moment, there is **Microsoft Azure**, which provides IaaS and PaaS services, and **Microsoft 365** and Office 365, which provide SaaS. The MUK group of companies is an authorized **Microsoft** distributor under the Cloud Solution Provider program.

O365 PRODUCT LINE:

TEAMWORK
▷ Microsoft Teams
▷ Sharepoint online
▷ Project online

COMMUNICATIONS
▷ Exchange online
▷ Microsoft Teams

▷ D365 Enterprise

MINKELS

A brand of legrand®

MINKELS

Minkels is part of the Legrand Group, whose products are presented in the low-voltage equipment, data networks, and data center markets. The **Minkels** portfolio of solutions for building data center infrastructure includes a number of products. The company offers a wide range of assembled servers and telecommunication racks and cabinets that are reliable, convenient, and flexible to use. They are built on a modular principle and can be used to solve a wide range of tasks. Cold aisle systems provide the opportunity to optimize cooling and energy efficiency due to the optimal separation of hot and cold air flows. Legrand and Raritan power distribution systems for data centers help reduce the risk of power outages, which is part of **Minkels'** strategy to provide energy-efficient solutions for data centers.

MAIN ACTIVITIES:

- Server Cabinets
- Network Cabinets
- Colocation Cabinets
- Cabinet Components
- Cable Management
- Airflow Management
- Security
- Wall Mount Enclosures
- Aisle Containment
- Nexpand Active Cooling

MONBAT

MONBAT

Monbat is a manufacturer of lead-acid batteries and energy-consuming lithium-ion cells for a wide range of applications. The company's portfolio includes a wide range of batteries – for backup power systems, solar panels, vehicles, warehouse equipment, and others. Modern equipment and the use of advanced technologies ensure the high quality of **Monbat** products.

Lead-acid batteries are designed and manufactured using state-of-the-art technologies and comply with a number of technological standards, including IEC 60 896-21/22 and IEC 61427 – 1/2, IEC 62485-2, IEC 61056-1 and BS 6290-4. Enclosure elements are made of high-quality non-flammable material. The product range includes 2, 4, 6, 8 and 12-volt batteries with capacities from 50 to 600 Ah for various applications – from telecommunications and backup power supplies to high-cycle batteries for solar installations. The **Monbat** starter battery range includes solutions for cars and commercial vehicles. The batteries cover the entire spectrum of passenger cars, trucks and agricultural vehicles operating in both normal and extreme environmental conditions.

MAIN ACTIVITIES:

▷ Starter batteries
▷ Industrial batteries
▷ Deep cycle batteries
▷ Energy systems

NAKIVO

NAKIVO is a developer of solutions for data backup in a virtual environment. The company's main product is **NAKIVO** Backup & Replication for data protection in VMWare, Hyper-V and AWS virtual environments. The solution is equipped with various features, such as installation on network drives, backup to tape or directly to the cloud, granular recovery, instant VM recovery, encryption, disaster recovery orchestration, failover and more.

MAIN ACTIVITIES:

▷ NAKIVO Backup & Replication Data protection, backup and recovery

NCOMPUTING

NComputing is the world leader in thin client manufacturing. The **NComputing** portfolio includes terminals for various fields, which allow you to share the resources of one workstation with up to 100 additional workplaces. The company creates specialized software compatible with all operating systems for its thin clients. **NComputing** products comply with international ISO 9001 standards. In addition, the company develops vSpace Pro desktop virtualization software and LEAF OS to improve the performance of older computers.

MAIN ACTIVITIES:

- Cloud-ready thin clients for Windows RX300
- EX400 Enterprise Thin Clients built on x86 CPU architecture
- RX-HDX clients for Citrix
- RX-RDP clients for Microsoft Remote Desktop Services
- L-series devices for hosting up to 100 concurrent virtual desktop sessions on a single vSpace server
- MX Series 3-user thin client kits offering affordable and green computing
- vSpace Pro desktop virtualization software
- LEAF OS

- Cloud Sync
- Cloud Tiering
- Cloud Backup Service
- Spot services

NEXCONEC

Nexconec is a global leader in high-performance structured cabling systems. **Nexconec** develops high-density, low-loss, pre-terminated fiber optic cabling solutions to support data center infrastructure. The company's products are custom-built and tailored to specific customer projects and operating conditions. With its ISO-9001-certified manufacturing facilities, **Nexconec** produces high-quality products at minimal cost and maximum benefit to its customers.

MAIN ACTIVITIES:

FIBER OPTIC SYSTEMS
- ▷ Patch Cords
- ▷ Multi-Fiber Assemblies
- ▷ MTP/MPO Assemblies
- ▷ Cables
- ▷ Rack Mount Enclosures
- ▷ MTP/MPO Modules and Panels
- ▷ Splitters and WDM
- ▷ Wall Mount Enclosures
- ▷ FTTH Boxes

- ▷ Outdoor Enclosures
- ▷ Fiber Accessories
- ▷ Racks and Cabinets
- ▷ Fiber Testing and Cleaning
- ▷ Outdoor ODVA

COPPER SYSTEMS
- ▷ Cables
- ▷ Patch Cords
- ▷ Power Supplies
- ▷ Patch Panels
- ▷ Connectors

ACTIVE COMPONENTS
- ▷ Media Converters
- ▷ SFP Transceivers
- ▷ SFP+ Transceivers
- ▷ SFP28 Transceivers
- ▷ XFP Transceivers
- ▷ 3G Video SFP
- ▷ QSFP+ Transceivers
- ▷ QSFP28 Transceivers
- ▷ Active Optical Cables (AOC)
- ▷ Direct Attach Copper Cables (DAC)

NEXSAN

NEXSAN

Nexsan is a manufacturer of highly reliable, cost-effective data warehouses tailored to specific requirements and use cases. **Nexsan** products transform traditional storage systems into solutions that deliver business value to customers with additional cloud services, data migration, and unrivaled backup capabilities to protect backups from malware.

MAIN ACTIVITIES:

▷ UNITY Unified 3rd generation storages
▷ E-SERIES High Density and Capacity Storage Systems
▷ BEAST Elite High Density Storage Systems
▷ ASSUREON secure storages
▷ All-Flash NVMe VEXATA High performance arrays
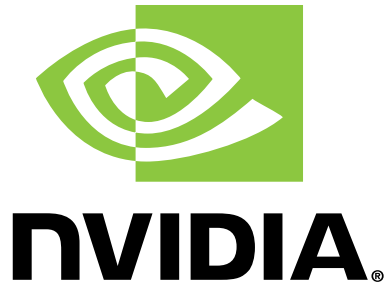

NVIDIA

NVIDIA is a pioneer in ultra-high-performance computing, which is preferred by the most demanding computer users – scientists, designers, artists and gamers. With the ongoing need for better 3D graphics and the growing gaming market, **NVIDIA** has turned the GPU into a computing powerhouse, paving the way for numerous innovations at the intersection of virtual reality and artificial intelligence.
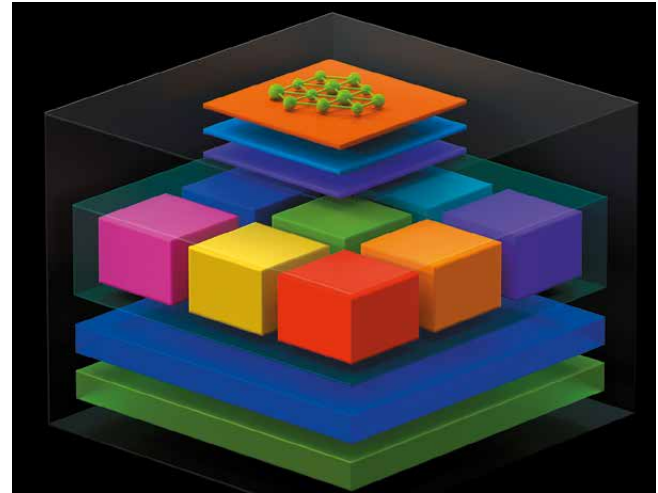

MAIN ACTIVITIES:

VIRTUAL GPU SOFTWARE FOR EVERY WORKLOAD

▷ NVIDIA Virtual Compute Server (vCS) – Accelerate virtualized AI compute workloads on KVM-based infrastructure

▷ NVIDIA RTX Virtual Workstation (vWS) – Virtual Workstations for creative and technical professionals using graphics applications

▷ NVIDIA Virtual PC (vPC) – Virtual Desktop (VDI) for knowledge workers who use office productivity applications & multimedia

▷ NVIDIA Virtual Applications (vApps) – Application streaming with Remote Desktop Session Host (RDSH) solutions

OMNISSA

Omnissa, a former VMware business, is the only company completely focused on the betterment of the digital workspace experience for both IT teams and employees. All is made possible with the **Omnissa Platform**, the first AI-driven digital work platform for smart, seamless, and secure work experiences from anywhere. It integrates multiple industry-leading solutions across Unified Endpoint Management, Virtual Desktops and Apps, Digital Employee Experience, and Security and Compliance. By continuously adapting to users' workstyles, **Omnissa** optimizes user experience, security, IT operations and costs.

MAIN ACTIVITIES:

DESKTOP & APP VIRTUALIZATION
- Horizon 8
- Horizon Cloud Service
- App Volumes
- Dynamic Environment Manager

ANYWHERE WORKSPACE
- Workspace ONE UEM
- Workspace ONE Experience Management
- Workspace ONE Assist
- Workspace ONE Intelligent Hub
- Workspace ONE Mobile Threat Defense
- Workspace ONE Productivity Apps
- Workspace ONE Tunnel

ORACLE | Partner

Value Added Distributor

On Premises   Cloud at Customer   Public Cloud

ORACLE

Oracle has prioritized cloud solutions to offer an unparalleled set of integrated cloud services (SaaS, PaaS, IaaS), a second-generation IaaS platform with SLA support, unique fully automated database and Linux services, and to maintain its leading positions in the field of On-Prem solutions (engineering systems, **Oracle** Database and Middleware products).

PACKETLIGHT NETWORKS

PacketLight Networks is a developer of CWDM/DWDM/OTN solutions for data networks, data centers, data, voice, video storage and other services. The company's portfolio includes products for building a highly efficient infrastructure for DWDM networks. It is a set of carrier-grade solutions featuring high performance, user-friendliness and competitive price.

PacketLight devices are versatile and can be used as part of a WDM infrastructure of any topology: from point-to-point networks to carrier-grade networks with a length of thousands of kilometers.

MAIN ACTIVITIES:

▷ All 1 Rack Unit devices
▷ 10G–400G solutions (single wave, muxponder)
  • for enterprise networks
  • for metro networks
  • for backbone networks
▷ Client support: 10G/40G/100G LAN/8G/16G/32G Fiber Channel/STM-64/OC-192 SDH/SONET/OTU2/OTU2e/OTU3/OTU4/OTN
▷ AES 256 based layer 1 data encryption

▷ Reconfigurable Optical Add-Drop Multiplexer (ROADM)
▷ EDFA optical amplifiers, standalone devices and integrated modules
▷ Hardware Link Redundancy
▷ Passive optical networks expansion solutions
▷ Maximum data transfer density – 96 channels of 200G or 48 channels of 400G

PALO ALTO NETWORKS

Palo Alto Networks is a developer of next-generation firewalls and one of the leaders in the global information security market. **Palo Alto Networks** solutions protect organizations from all types of threats by leveraging the latest security, automation, and analytics advances.

Next-generation **Palo Alto Networks** firewalls provide exceptional insight and monitoring of company traffic and allow control over individual applications, users, file types, and content. They use information about existing threats from many different sources, apply automation capabilities to reduce response time and provide unlimited access to all components of the Security Operating Platform. **Palo Alto Networks** firewall protection modules also use innovative machine learning and behavioral analysis methods and have many techniques for protecting critical segments of financial, medical, energy and telecom networks while providing data transfer rates up to 360 Gb/s. Firewalls are available as physical or virtual devices, as well as a cloud service.

MAIN SOLUTIONS:

▹ STRATA Next Generation firewalls HW and virtual appliances with ML & Deep Learning on the board
▹ First in the class virtual firewalls CN series for containers of Kubernetes
▹ PRISMA SASE provides secure access for remote workers via the Cloud
▹ PRISMA Cloud protection of the infrastructure in the Cloud
▹ Cortex XDR best-in-class end-point protection and investigation of incidents (Windows, Linux, Android, iOS)
▹ Automation of processes, orchestration of information security products, incident management using Cortex XSOAR
▹ Cortex XSIAM is a new SIEM solution, which helps to resolve to address threats why more quickly and efficiently, reduce risk, and track metrics

Penta SECURITY

PENTA SECURITY

Penta Security is an information technology security company founded in 1997 and headquartered in Seoul, Korea. The company is the market leader in the Asia-Pacific region. **Penta Security** offers solutions to protect web applications, databases and IoT devices.

MAIN ACTIVITIES:

▷ Web Application Firewall (WAF) to detect and block attacks on the website. Protects against SQL injection, Brute force URLs, cookie spoofing, hidden field manipulation, OS command injection, XSS vulnerability, directory indexing, web settings and admin web page violations, and malicious file trial loading, which prevents information leakage through web attacks

▷ High-performance hardware and software platform for web resources protection with support for

virtual devices and cloud environments, based on the latest protection method, which includes a logical analysis engine (WAF) – WAPPLES

▷ Database security solution with encryption and decryption and built-in security tools – D'Amo

▷ System for ensuring information confidentiality and integrity, users and resources authentication – ISign +

PEPLINK

Peplink is a leading SD-WAN technology provider and a developer of innovative 4G and 5G LTE routers and modems. Peplink provides a full range of solutions for building secure connections, intelligent load balancing, and access to SaaS services for the corporate, industrial and government sectors. The company's solutions are used in a wide variety of industries – hotel business, healthcare, education, trade, financial sector, construction, transportation, etc.

MAIN SOLUTIONS:

▷ Enterprise routers
▷ Mobile routers
▷ Routers for small business and home office
▷ Enterprise-grade mobile solutions
▷ Wi-Fi and PoE switches
▷ Antennas and accessories

QNAP

QNAP Systems Inc. is a leading manufacturer in storage, computing and networking. **QNAP** offers high-quality network-attached storage (NAS), network (network switches) and smart video (QVR Pro) products based on the principles of usability, high security and flexible scalability. **QNAP** is committed to providing end-to-end solutions, from software development, hardware design to in-house manufacturing. **QNAP's** own factory with complete production lines is certified to ISO 9001 Quality Management Systems, ISO 14001 Environmental Management Systems, ISO 45001 Occupational Health and Safety Management Systems, and ISO 27001 Information Security Management Systems.

MAIN ACTIVITIES:

NETWORK-ATTACHED STORAGE (NAS)
▷ For the corporate segment
▷ For small and medium enterprises
▷ For home and office

QVR PRO IP DVRS
▷ For the corporate segment
▷ For small and medium enterprises
▷ For home and office

RADWARE

Radware is a manufacturer of solutions for delivering applications and combating advanced multi-target attacks against network equipment, servers and applications. This array consists of:

- DefensePro: fight against DDoS (behavioral and signature analysis) with automatic recognition and attack blocking. DefensePipe cloud service with a large number of cleaning centers around the world;
- Alteon: SSL hardware acceleration, optimization (caching, compression, multiplexing) and traffic balancing to increase the fault tolerance of services and their delivery speed to the consumer, as well as an integrated HTTP/2 gateway as part of the application delivery controller, which returns content from the HTTP 1.1 server, optimized to take advantage of the speed and security of HTTP/2. The gateway does not require changes on the server side and makes it possible to use both HTTP/2 and HTTP/1.1 to serve all types of browsers;
- WEB Aplication Firewall (WAF): to clean web traffic from the application level attacks (SQL-injection, Cross Site Scripting, Slow Rate Attack, etc.);
- APSolute Vision: centralized management and event analysis system;
- specialized technical support for rapid response – ERT (Emergency Response Team) – for prompt assistance in repelling an attack in real time.

MAIN ACTIVITIES:

SERVICE SECURITY AND AVAILABILITY

- ▷ High-performance hardware and virtual platform for protection against DDoS attacks – DefensePro
- ▷ Cloud-based protection against DDoS attacks – Defense Pipe
- ▷ Hardware and virtual tools for application delivery balancing and accelerating with integrated ADC, WAF, FastView, HTTP/2 gateway, SSL acceleration, IPS – Alteon at speeds up to 200 Gbps
- ▷ Hardware, virtual and cloud protection of web portals – WEB Aplication Firewall

RANOREX

Ranorex's solutions enable software developers to test the interface of their own software products by providing comprehensive tools that can handle even the most complex user interfaces to automate. The flagship product **Ranorex Studio** provides user interface automation for use on various devices – network, mobile, workstations, etc. The functionality of the solution allows to use it for intelligent code completion, refactoring, debugging, as well as to quickly create reliable supported tests. In addition, **Ranorex Studio** is equipped with repositories of reusable objects and test automation modules.

MAIN ACTIVITIES:

▷ Ranorex Studio automation of the user interface
▷ Ranorex Webtestit Lightweight testing environment
▷ Selector generator for Selenium Ranorex Selocity

Version Control
Git, SVN, TFS

Build & Release Management
TFS, Jenkins, Hudson, Bamboo …

Test Infrastructure & Environment
Selenium Grid, BrowserStack, Sauce Labs…

Rx Ranorex Studio

Test Management
HP ALM, MS Test Manager, TFS, Jira, TestShell, TestBench …

RICOH

RICOH

Ricoh is a well-known manufacturer of reliable printing equipment for the corporate segment. Over the past five years, the company has become a leader in production printing and is actively expanding its success in the SOHO equipment segment.

The advantages of **Ricoh** lie in the development and promotion of solutions for related areas of information processing and visualization. For the third year in a row, **Ricoh** is the world's market leader in print management services, and the product line is expanded with projectors, communication systems and interactive whiteboards.

MAIN ACTIVITIES:

▷ MFP
▷ Laser printers
▷ Widescreen systems

▷ Production printing
▷ Digital duplicators
▷ Software

▷ Projectors
▷ Communication systems
▷ Interactive whiteboards

RSA SECURITY

RSA Security specializes in the development of effective software solutions for the protection of corporate information. The company offers families of products for managing authentication data and access to IT resources, secure mobile and remote access systems, tools for building enterprise authentication infrastructures, electronic transactions protection, and secure customer authentication systems.

MAIN ACTIVITIES:

MULTI-FACTOR AUTHORIZATION
▷ SecurID provides secure access to cloud and on-premises systems with modern, user-friendly, risk-based multi-factor authentication and automated identity controls

INFORMATION SECURITY MANAGEMENT
▷ NetWitness Platform - an advanced SIEM and XDR solution to quickly detect, analyze and respond to the most advanced threats

FRAUD PREVENTION
▷ Outseer Fraud Manager
▷ Outseer 3-D Secure
▷ Outseer FraudAction

RISK MANAGEMENT
▷ Archer Integrated Risk Management is a proven way to help clients take over risk management

RUCKUS NETWORKS

"Good enough is never really good enough" – this is the slogan under which **Ruckus Networks** offers solutions. Today's commercial environment demands more and more functionality across all IT solutions, and "good enough" connectivity is never good enough. That's why **Ruckus Networks** designs and builds truly purpose-built network infrastructure that meets the most stringent requirements of all types of enterprise environments.

Ruckus Networks solutions offer a full range of networking equipment, including Wi-Fi access points, network switches, software, cloud services and other solutions based on advanced algorithms of artificial intelligence and machine learning.

Ruckus Networks' main customers are educational institutions, healthcare institutions, government organizations and retail outlets.

MAIN ACTIVITIES:

▷ Wireless Access Points
▷ Ethernet Switches
▷ WAN Gateway
▷ Network Control & Management
▷ IoT Networking Systems
▷ Network Access & Policy
▷ Service Assurance and Business Intelligence
▷ Network Reporting

SOPAR

SOPAR is a manufacturer of projection screens, projectors, and accessories. **SOPAR** products are characterized by optimal performance, strict precision in details and innovative and attractive design.

MAIN ACTIVITIES:

▷ Projection screens
▷ Mounts and stands
▷ Holographic screens and films
▷ Projector fabrics

▷ Sun protection shading systems
▷ Interactive multimedia boards
▷ Monitors
▷ Laser projectors

SAMSUNG

SAMSUNG

Samsung Electronics brings cutting-edge ideas to life and innovates to inspire people and shape the future of the consumer market in the world of smartphones, TVs, wearables, tablets, home appliances, medical devices, semiconductors and LED solutions. For more information, visit the official website **http://www.samsung.com.**

MAIN ACTIVITIES:

VISUALIZATION SOLUTIONS
▷ Information and advertising smart displays
▷ Smart Hospitality TV
▷ Samsung Flip
▷ Monitors
▷ BizTV
▷ LED screens

MOBILE SOLUTIONS FOR BUSINESS
▷ KNOX security and information protection for mobile devices
▷ Tablets
▷ Smartphones

SANEBOX

SaneBox is a developer of email filtering software. This software helps you to manage email by filtering messages that it considers unimportant into a folder for further processing and allowing you to spend much less time reading them. The solution integrates with IMAP and Exchange Web Services email accounts, works with all email services, and doesn't require any applications to be installed.

MAIN ACTIVITIES:

SANEBOX EMAIL FILTERING SERVICE

SIEMON

Siemon is a world-renowned designer and manufacturer of network cables, interconnecting devices, passive interconnecting equipment and structured cabling systems for the telecommunications industry. **Siemon's** portfolio includes Category 5e, 6 and 7 copper and fiber optic cabling systems, as well as high-speed networking devices for data centers, healthcare facilities, the automotive industry and other market segments.

MAIN ACTIVITIES:

- ▷ Copper cabling systems
- ▷ Fiber optic cabling systems
- ▷ Patch panels and adapters
- ▷ Racks and cable management
- ▷ Solutions for automated building infrastructure management: Intelligent Buildings

- ▷ Secure industrial connections
- ▷ High Speed Interconnects (HSI)
- ▷ Tools and testers
- ▷ Connection blocks
- ▷ Fiber optic routing systems

SMIDDLE

Smiddle is a developer of software products that allow you to improve, optimize and control all components of the contact center. Each Smiddle software product offers thoughtful, high-quality functionality that enables you to solve essential tasks and real problems that contact centers face. **Smiddle** is an official Cisco partner with the status of Solution Partner, the company's representative offices operate in Ukraine and Estonia.

MAIN ACTIVITIES:

▷ Recording and storage of conversations with clients Smiddle Recording

▷ Integration of messengers in the contact center Smiddle Omnichannel Messenger Connector

▷ Customer service quality control Smiddle Quality Management

▷ Creating scripts for communication with customers Smiddle Agent Scripting

▷ Client cards and history of interactions Smiddle Contact Manager

▷ Video call + chat based on WebRTC technologies for Internet users Smiddle Site Videocall

▷ Organizing, conducting and processing the results of outgoing campaigns in the contact center Smiddle Campaign Manager

▷ Software extension of Cisco Meeting Server functionality for creating chat rooms Smiddle Video Conference Extender

▷ Automatic routing of the call of the subscriber to the internal number of the employee in the company Smiddle Smart Callback

▷ Voice biometrics technology Smiddle Voice ID

▷ Processing customer requests and business history in various areas in one interface Smiddle CRM-Finesse Connector

▷ Real-time cybersecurity protection and management with Smiddle Security Administration Platform

StarWind SOFTWARE

STARWIND

StarWind is a storage software developer certified for use in virtual environments such as VMware vSphere, Microsoft Hyper-V, and Citrix XenServer. **StarWind** products are high-performance, cost-effective storage management solutions trusted by over 100,000 users worldwide.

MAIN ACTIVITIES:

SOFTWARE

- ▷ StarWind Virtual SAN: A software-defined storage solution that eliminates the need for physical shared storage by mirroring internal hard disks and flash between hypervisor servers
- ▷ StarWind SAN & NAS: A unified storage solution that combines SAN and NAS capabilities, providing a versatile storage infrastructure
- ▷ StarWind VTL: A virtual tape library solution that helps organizations meet regulatory requirements for data retention and offsite storage
- ▷ StarWind NVMe-oF Initiator for Windows: A solution that enables NVMe over Fabrics (NVMe-oF) connectivity for Windows servers, enhancing performance and reducing latency

HARDWARE SOLUTIONS

- ▷ StarWind HyperConverged Appliance: An all-in-one hyperconverged infrastructure solution that integrates compute, storage, and networking in a single appliance
- ▷ StarWind Backup Appliance: A purpose-built backup appliance designed to provide reliable and efficient data protection
- ▷ StarWind VTL Appliance: A hardware-based virtual tape library solution that simplifies backup and archival processes
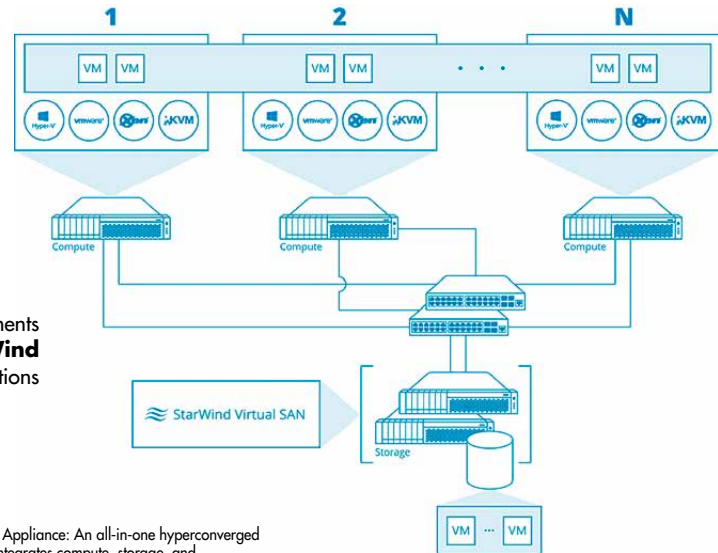

STRATUS TECHNOLOGIES

Stratus Technologies is a manufacturer of solutions that help prevent failures in the infrastructure of organizations and provide fault tolerance for applications. **Stratus Technologies** customers include industrial enterprises, retail chains, financial sector organizations, telecom operators, public organizations, healthcare, and transport and logistics companies.

TECNOWARE

ITALIAN POWER SYSTEMS

TECNOWARE

Tecnoware is an Italian company that designs, manufactures and maintains uninterruptible power supplies that provide uninterrupted electric power supply for personal computers, electro-medical and industrial equipment, data centers, network and telecommunication systems. All **Tecnoware** equipment complies with EU standards and the requirements of the modern world. The company maintains a course of continuous investment in innovation and far-sighted strategic planning.

Tecnoware's portfolio includes line-interactive and synchronous line-interactive UPSs, single and three-phase online UPSs, electrical stabilizers, generators, transformers, batteries and other UPS accessories. The company also offers telecommunication cabinets for floor and wall mounting, power distributors and a range of consumer accessories – chargers for laptops and mobile phones, power banks, fans, etc.

MAIN ACTIVITIES:

- ▷ Line-Interactive UPS
- ▷ Sine wave line-interactive UPS
- ▷ Single-phase online UPS
- ▷ Three-phase online UPS
- ▷ Electricity stabilizers
- ▷ Generators
- ▷ Transformers
- ▷ Batteries
- ▷ UPS accessories
- ▷ Cabinets and accessories
- ▷ Chargers and power banks

COPPER FASTEN TECHNOLOGIES

CopperFasten Technologies specializes in the development and implementation of advanced Internet security products. **CopperFasten** develops software for business security. The company offers gateways and cloud products and protects companies from modern threats that enterprises face. **CopperFasten** is known for launching one of the first virtual anti-spam appliances, SpamTitan, an email security software suite specifically designed to run on VMware virtual machines during the rise of virtual machines.

MAIN ACTIVITIES:

- ▷ SpamTitan virtual anti-spam appliance
- ▷ PhishTitan phishing protection and prevention tool in Microsoft 365
- ▷ WebTitan DNS filtering solution
- ▷ ArcTitan email archiving solution
- ▷ TitanSecure ransomware, phishing, spear phishing and cyber-attack protection tool
- ▷ SafeTitan real-time security enhancement solution
- ▷ EncryptTitan full-featured encryption system
- ▷ SpamTitan Plus anti-phishing solution

TP-LINK

TP-Link is a global provider of trusted business networking solutions, such as **TP-Link** Omada and VIGI intelligent solutions. In 2017, **TP-Link** created and launched Omada cloud service, a comprehensive solution for small and medium businesses, providing full management of access points, switches and network routers from anywhere at any time for use in government agencies, hotels, schools, retail chains, hospitals, offices, manufacturing and other industries. In 2020, the VIGI brand for enterprise security was founded, providing professional-level surveillance.

MAIN ACTIVITIES:

▷ Wi-Fi access points for the business of modern AC and AX standards in various options for both external and internal design

▷ Managed and unmanaged switches with or without PoE support for building reliable wired networks

▷ Business routers for small and medium businesses

▷ Omada controllers for network management

▷ Omada accessories for more flexible network deployment

▷ Surveillance cameras of various designs and resolutions that allow you to see the smallest details

▷ Network recorders with different numbers of channel connections that provide continuous 24/7 recording

▷ Software for camera management and real-time surveillance

TRIPP LITE BY EATON

Tripp Lite specializes in connectivity solutions for data center infrastructure. **Tripp Lite's** wide range of products allows customers to fully equip their data center with a full range of communications solutions.

MAIN ACTIVITIES:

- ▷ Surge Protectors
- ▷ Power Extension Cords
- ▷ Power Cords and Adapters
- ▷ Network Interfaces and Sensors
- ▷ USB and Wireless Chargers
- ▷ Converters
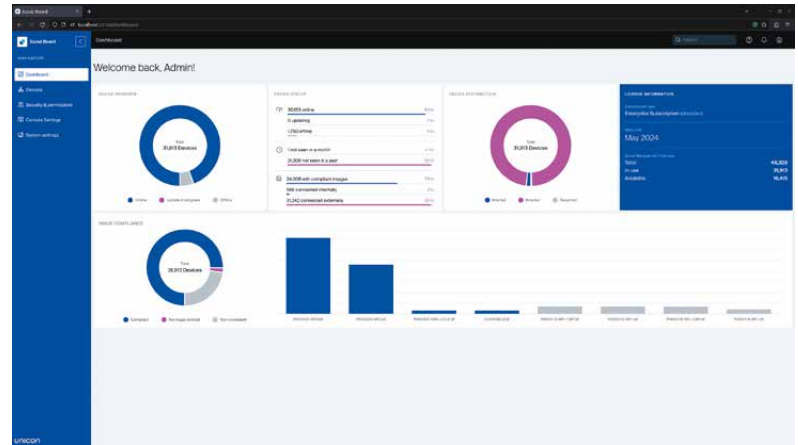

UNICON

Unicon is a developer of infrastructure management software for user systems. Unicon offers solutions for corporate management of workstations and thin clients. The company's products will be an excellent choice for both small companies and organizations with hundreds or thousands of endpoints.

MAIN ACTIVITIES:

▷ eLux operating system for Linux-based x86 endpoints
▷ Scout endpoint management system
▷ Integrated Scout Cloud Gateway (SCG) solution for connecting endpoint devices operating in remote, distributed environments

VEEAM

Veeam Software is a privately held, U.S. information technology company with a U.S. based leadership team.

**Veeam's** backup solutions ensure that all applications across virtual, physical and cloud environments are available from a single management console. Now **Veeam** is the #1 solution for protecting VMware vSphere and Microsoft Hyper-V, Nutanix AVH, Red Hat Virtualization data, and ensuring the availability of any application and data in any cloud. The solution combines the power of backup and replication, allowing you to forget about outdated backup solutions forever.
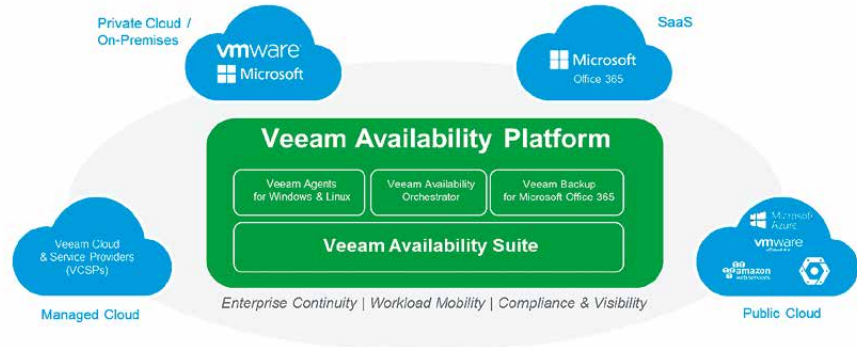

MAIN ACTIVITIES:

▷ Veeam Data Platform Advanced comprehensive solution for data backup, recovery and replication, as well as monitoring, reporting and capacity planning

▷ Veeam Data Platform Foundation solution for restoring virtual machines and virtualized data hosted on-premises or in a private cloud

▷ Veeam Agent solution provides physical and cloud data backup and recovery

▷ Veeam ONE solution for real-time virtual environment monitoring, performance analysis and resource optimization, and reporting

▷ Veeam Backup for Microsoft Office 365 solution for Office 365 data back up and protection

▷ Veeam Management Pack solution for System Center to control the physical and virtual environment at all levels, from applications to hardware

▷ Veeam Recovery Orchestrator solution to automate creating, documenting and testing disaster recovery plans

▷ Veeam KASTEN K10 for Kubernetes backup and disaster recovery

▷ Veeam Plug-in for Oracle RMAN - backing up Oracle databases and logs using RMAN, consistent with the state of transactions, to restore to the desired state

▷ Veeam Plug-in for SAP HANA - backing up SAP databases and logs using backint, consistent with the state of transactions, to restore to the desired state

▷ Veeam Plug-in for Microsoft SQL Server is a backup tool for Microsoft SQL Server databases. Veeam Plug-in integrates with Microsoft SQL Server Management Studio and transfers database backups and transaction log backups to backup repositories configured in Veeam Backup & Replication

▷ Veeam Backup for Salesforce eliminates the risk of losing your Salesforce data and metadata due to human error, integration issues, and other Salesforce data loss scenarios

VERITAS

VERITAS

Veritas is an American company that develops storage management software for organizations. **Veritas** develops and delivers solutions for backup and recovery, business continuity, information management and storage management. It offers system recovery solutions to protect desktops, laptops, servers, virtual machines, and NetBackup appliances that provide backup and recovery for data centers, remote offices, and virtual environments. Present on the market since 1983, today the company occupies a leading position in the protection and management of the IT infrastructure of organizations. All software products are based on innovative technologies in data backup and recovery. The **Veritas** product line is a range of integrated products in three main areas: availability, security and analysis.

MAIN ACTIVITIES:

▷ Accessibility products deliver predictable accessibility, application resiliency, and storage efficiency across cloud, virtual, and physical environments
  • InfoScale
  • Resiliency Platform

▷ Data protection products keep data safe, protect the enterprise from unexpected events and ensure that data can be recovered wherever it is stored
  • NetBackup
  • NetBackup Appliances
  • Backup Exec
  • CloudPoint
  • SaaS Backup

  • Desktop and Laptop Option
  • Access
  • Access Appliance
  • Flex Appliance
  • System Recovery

▷ Analytics products visually present data to help optimize risk, cost, and meet regulatory requirements
  • APTARE IT Analytics
  • Information Studio
  • Enterprise Vault
  • Enterprise Vault.cloud
  • eDiscovery Platform
  • Data Insight

VERTIV

Vertiv designs, builds and maintains critical infrastructures that power critical systems from data centers to communications networks and industrial facilities. **Vertiv** provides a wide range of power, thermal and infrastructure management solutions.

The company's portfolio includes uninterruptible power supplies, air conditioning systems, DC power systems, static transfer switches, power distributors, server cabinets, monitoring systems, EDGE solutions and KVM switches.

MAIN ACTIVITIES:

POWER MANAGEMENT

- Uninterruptible power supplies
- DC power systems
- Power distribution
- Industrial AC and DC systems
- Static transfer switches
- Power systems control and monitoring devices

PRECISION AIR CONDITIONING SYSTEMS

- Integrated cooling
- Server rooms cooling

- In-row cooling systems
- Rack cooling
- Adiabatic free cooling systems
- Free cooling chillers
- Precision air conditioning systems and monitoring

RACKS AND INTEGRATED SOLUTIONS

- Integrated solutions
- Racks and isolated systems
- Outdoor enclosures

POWER MANAGEMENT

- Serial consoles and gateways
- IP KVM Switches
- Desktop KVM and KM
- Software
- Monitoring
- IT infrastructure management

VMWARE BY BROADCOM

VMware by Broadcom is a global leader in virtualization and cloud infrastructures. **VMware by Broadcom** provides proven solutions that make IT environments more efficient by simplifying them and helping achieve a more agile and adaptive service delivery model. **VMware by Broadcom** products help companies adopt a cloud model that meets their unique challenges, accelerates the transition to cloud computing, protects their existing investments, and increases levels of security and control.
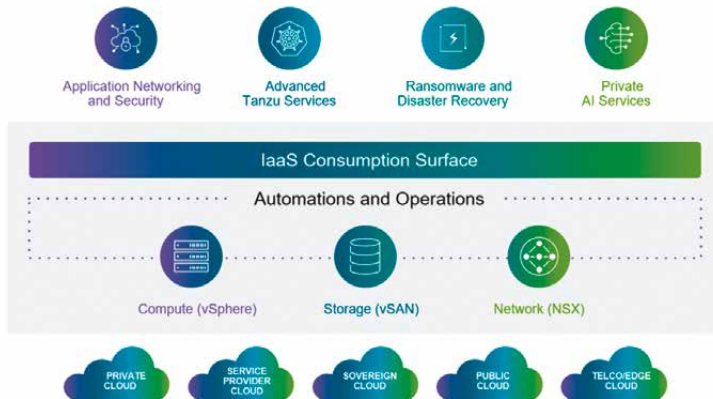

MAIN PRODUCTS:

CLOUD INFRASTRUCTURE
- ▷ VMware Cloud Foundation (VCF)
- ▷ VMware vSphere Foundation (VVF)
- ▷ VMware vSphere Standard (VVS)

MODERN APPLICATION PLATFORM
- ▷ VMware Tanzu Platform (part of VCF and VVF)
- ▷ VMware Tanzu Intelligence Services (add-on to VCF)
- ▷ Tanzu Application Platform (add-on to VCF)
- ▷ Tanzu Mission Control (add-on to VCF)
- ▷ Tanzu Spring Runtime (add-on to VCF)

NETWORKING AND SECURITY
- ▷ NSX Data Center (part of VCF)
- ▷ NSX vDefend Firewall (add-on to VCF)
- ▷ NSX vDefend Firewall with Advanced Thread Prevention (add-on to VCF)
- ▷ Avi Load Balancer

DR AND AVAILABILITY
- ▷ vVMware Live Site Recovery
- ▷ VMware Live Cyber Recovery

HYPERCONVERGED INFRASTRUCTURE
- ▷ vSAN (add-on to VCF and VVF)

CLOUD AUTOMATION AND MONITORING
- ▷ VMware Aria Suite Lifecycle (part of VCF and VVF)
- ▷ VMware Aria Automation (part of VCF)
- ▷ VMware Aria Operations (part of VCF and VVF)
- ▷ VMware Aria Operations for Logs (part of VCF and VVF)
- ▷ VMware Aria Operations for Networks (part of VCF)

SOFTWARE DEFINED EDGE
- ▷ VMware VeloCloud SD-WAN

XFUSION

xFusion Digital Technologies is a leading global provider of computing infrastructures and services. Guided by the vision "Let Computing Serve You Better", **xFusion** continuously creates value for customers and partners, and accelerates the digital transformation of various industries. With a global footprint, **xFusion** has established 9 research centers, 7 regional offices, and 6 Global Technical Assistance Centers (GTACs) worldwide. We have delivered innovative computing solutions to over 10,000 customers in over 100 countries and regions, such as telecom, finance, internet, transportation, and energy.

MAIN ACTIVITIES:

▷ FusionServer Rack Servers
▷ AI Servers
▷ Liquid-cooled Servers FusionPoD
▷ Intelligent Management Software Platform

YSOFT SAFEQ®

YSOFT

YSoft is a solution that guarantees control over printing, copying and scanning. **YSoft** SafeQ provides full management and administrative control over all print, copy or scan operations. This solution provides high security for all documents, cost savings, protection of natural resources and other very convenient working conditions for users.

KEY SOLUTION ELEMENTS:

- ▷ Software licenses
- ▷ Terminals
- ▷ Card readers
- ▷ 3D printers

ZENDURE

SuperCharged⊕⊝

ZENDURE

Zendure is a company that designs and manufactures energy storage systems: smart charging stations, battery extension modules, foldable solar panels and compact charging stations. The main goal of Zendure is to create products for accumulating and storing clean energy.

The **Zendure** product portfolio allows you to choose the optimal solution for consumers' accumulation and backup power. In particular, it includes innovative charging stations that can be charged from several energy sources simultaneously, which will significantly reduce the charging time of the station. For example, from solar panels and the city's power grid, or from solar panels and an electric vehicle charger. Such power station allows you to create an autonomous power supply system of high availability. Higher models allow scaling the power of the system due to the parallel connection of the stations and their capacity due to additional battery modules.

MAIN ACTIVITIES:

- ▸ Intelligent charging stations
- ▸ Additional battery modules
- ▸ Portable charging stations
- ▸ Foldable solar panels

ZIMBRA

Zimbra, developed by the American company Synacor, is a leading provider of commercial mail servers and corporate communication solutions. The flagship product, **Zimbra Collaboration**, offers a comprehensive suite for efficient and productive collaboration among company employees. This suite includes email services, address books, calendars, task managers, file collaboration tools, a corporate messenger, group chats, video conferencing, and video calls.

Zimbra is an open-source product that runs on Linux. It is fully compatible with Microsoft Exchange and Outlook, allowing customers to migrate to a system with broader and more flexible functionality at a significantly lower cost. Over 5,000 companies in 140 countries have chosen the **Zimbra Collaboration** platform as their corporate standard, with more than 100 million users relying on **Zimbra**services daily.

MAIN ACTIVITIES:

▷ Mail server
▷ Messenger and group chats
▷ Collaboration with documents
▷ Calendars
▷ Task managers
▷ Videoconferencing
▷ Video calls

MUK INTERNATIONAL

MAIN ACTIVITIES:

▸ Warranty and non-warranty support of equipment
▸ Warranty extension
▸ Installation, deployment and commissioning
▸ Provision of contract services with a guaranteed recovery time of equipment from four hours
▸ Supply of spare parts

You can contact us and get detailed information about the service by calling the numbers listed on the website of our company **http://www.muk.group**,
or by sending an e-mail to **int@muk.ua**.

MUK International

Since 2010, the **MUK International Company** has been organized in the MUK group of companies. Applying the already successfully proven business model and providing partners with the benefits of Value Added Distribution, the company is developing sales and after-sales service of equipment in the CIS countries and Eastern Europe. Having all the necessary technical capabilities to provide quality after-sales service, **MUK International** provides services for guaranteed restoration of failed equipment, warranty and post-warranty support, equipment warranty extension for up to five years, installation and maintenance of equipment for corporate clients in Azerbaijan, Armenia and Georgia. The service also has the necessary base to provide the required level of support on the territory of Kazakhstan, Moldova, Uzbekistan and other countries.. The service center staff consists of certified engineers who undergo regular training and refresher courses, guaranteeing customers high-quality and professional equipment repairs. Separate premises of service centers with their own storage facilities guarantee the implementation of the declared recovery time.

We are a service partner for Dell, Lenovo, IBM, H3C, Grandstream, Jabra and others.

Many world-famous companies like Google, Epam, Hynix, etc. trust us with their equipment.

MUK Training Center

MUK pays a lot of attention to training the staff of partners and customers. The company's training center offers a variety of authorized courses from the world's leading manufacturers of the IT industry. The TC **MUK** portfolio includes over 700 training courses from leading IT companies.

MUK Training Center is a leader in the IT educational services market with a 20-year history. The Training Center operates in Azerbaijan, Georgia, Kazakhstan, Slovenia, Uzbekistan and Instructor-Led Virtual Training format is carried out in all countries where **MUK International** has offices.

MUK TRAINING CENTER HAS THE FOLLOWING STATUS:

- Amazon Web Services Training Partner
- Autodesk Authorized Training Center
- CommScope Authorized Trainer Assessor
- Check Point Authorized Training Center
- Cisco Learning Partner
- Dell Authorized Training Partner
- EnGenius Academy Authorized Training Partner
- Fortinet Authorized Training Center
- Grandstream Academy Training Partner
- Hewlett Packard Enterprise Training Partner

- LearnQuest Premium Learning Partner
- Lenovo Accredited Training Partner
- Microsoft Learning Partner
- NetApp Authorized Learning Partner
- Oracle Education Reseller and Oracle Approved Education Provider
- Palo Alto Networks Authorized Training Partner
- Pearson VUE Authorized Center
- Penta Security Training Partner
- Red Hat Advanced Training Partner
- VEEAM Authorized Education Center
- VMware Cloud Foundation – Education Delivery Partner Broadcom

MUK TRAINING CENTER PROVIDES:

INDIVIDUAL CONSULTING

- Help in choosing a course
- Drawing up a training plan
- Recommendations for certification and preparation plan
- Organization and delivery of certifications in the PearsonVUE test center

ORGANIZATION OF TRAININGS IN VARIOUS FORMATS

- Training as part of a group according to a general schedule
- Corporate courses for your specialists and teams
- Instructor-led distance learning (ILO, ILT, LVC)
- Self-paced learning online (SPVC, TOD, ULS, CLS)
- Partner events
- Webinars, business game emulators
- Development and implementation of tests for IT professionals

5 REASONS TO TRAIN WITH THE MUK TRAINING CENTER:

- Choice of over 700 in-depth technical training programs from 20 global IT market leaders
- Gaining practical experience and involvement in a continuous development process
- Exchange of ideas and interaction with like-minded people, technology gurus, executives and experts from leading IT companies
- Verification and confirmation of your knowledge and skills in the training and certification process.
- Certification of IT departments employees is the greatest indicator of successful IT projects

THE RANGE OF IT DISTRIBUTION ALBANIA INCLUDES:

- Amazon Web Services
- Alibaba Cloud services
- Nexsan data storage systems
- Avigilon video surveillance systems
- Bitdefender, Endpoint Protector by CoSoSys and TitanHQ security solutions
- EnGenius, PacketLight and Peplink network equipment
- Commscope, Excel Networking, Nexconec and Siemon infrastructure solutions

- Tecnoware power management solutions
- Genie Networks traffic analysis solutions
- Conteg server cabinets
- Bluetti power stations
- Centerm thin and zero clients
- BitTitan migration services
- Dropsuite data backup, archive and recovery solutions

IT DISTRIBUTION ALBANIA PARTNERSHIP BENEFITS:

- The MUK Group of Companies is represented in 19 countries;
- The VAD model allows our partners to receive a whole range of value-added services;
- Quick access to engineers, pre-sales, marketing managers, training and service centers due to the company's unified IT ecosystem;
- Certified specialists with extensive experience in multi-vendor projects;
- Individually provided range of services that allows for flexible pricing;
- Company-owned digital trading platform for automating order placement, provision, management, billing, invoicing, marketing and support;
- Sole distributor of Amazon Web Services in the CIS region;
- Extensive experience in credit risk management and co-financing of transactions;
- Work in local currencies in all countries of presence and hedging of local currency rates;
- Assistance in securing projects and registering in rebate and other channel programs of vendors;
- Marketing support;
- Logistics and order processing 24/7;

- Single entry point for access to all regional product and demonstration warehouses;
- Opportunity to find new markets in the countries of presence;
- Consulting, installation and support of hardware, software and cloud solutions;
- Successful track record and timely fulfillment of commitments to gain the trust of partners in the countries of presence;
- Support for partners in development of their business;
- MUK training center, certified by vendors;
- Own service center with a broad portfolio of professional services;
- Large and multinational team speaking 20 languages;
- Ability to support and implement projects of any complexity and scale;
- Wide range of demonstration equipment for demonstration and pilot installations;
- Products and solutions from major vendors;
- Our architects and engineers have a wide range of certificates for the implementation of various solutions.

Turkey

The MUK group of companies started supplying equipment to Turkey in 2019. MUK TEKNOLOJI specialists take an active part in the development and implementation of projects using these solutions, providing a range of additional services for their dealers and developing the Value-Added Distribution model. During the work, agreements were signed with such manufacturers in the IT industry as AppDynamics, Barracuda Networks, BitTitan, Black Box, Bluetti, Centerm, Conteg, DataCore Software, Delta, Dropsuite, Endpoint Protector by CoSoSys, EnGenius, Excel Networking, Genie Networks, Hirsch, Idemia, Infinidat, Kstar, Monbat, Nakivo, Netwrix, Nexconec, Nexsan, RCG Power, SaneBox, Siemon, StarWind, Tecnoware, TitanHQ, Unicon. The list of contacts is constantly expanding, and the company is actively developing a partner network in Turkey, selling exclusively through its partners and helping them to implement projects of various scales for customers in various fields of activity.

THE RANGE OF MUK TEKNOLOJI INCLUDES:

- Nexsan data storage systems
- Barracuda Networks, Endpoint Protector by CoSoSys, Netwrix and TitanHQ security solutions
- EnGenius network equipment
- Commscope, Excel Networking, Nexconec and Siemon infrastructure solutions
- Delta Electronics and Tecnoware power management solutions

- Genie Networks traffic analysis solutions
- Conteg server cabinets
- Bluetti power stations
- Centerm thin and zero clients
- BitTitan migration services
- Dropsuite data backup, archive and recovery solutions

MUK TEKNOLOJI PARTNERSHIP BENEFITS:

- The MUK Group of Companies is represented in 19 countries;
- The VAD model allows our partners to receive a whole range of value-added services;
- Quick access to engineers, pre-sales, marketing managers, training and service centers due to the company's unified IT ecosystem;
- Certified specialists with extensive experience in multi-vendor projects;
- Individually provided range of services that allows for flexible pricing;
- Company-owned digital trading platform for automating order placement, provision, management, billing, invoicing, marketing and support;
- Sole distributor of Amazon Web Services in the CIS region;
- Extensive experience in credit risk management and co-financing of transactions;
- Work in local currencies in all countries of presence and hedging of local currency rates;
- Assistance in securing projects and registering in rebate and other channel programs of vendors;
- Marketing support;
- Logistics and order processing 24/7;

- Single entry point for access to all regional product and demonstration warehouses;
- Opportunity to find new markets in the countries of presence;
- Consulting, installation and support of hardware, software and cloud solutions;
- Successful track record and timely fulfillment of commitments to gain the trust of partners in the countries of presence;
- Support for partners in development of their business;
- MUK training center, certified by vendors;
- Own service center with a broad portfolio of professional services;
- Large and multinational team speaking 20 languages;
- Ability to support and implement projects of any complexity and scale;
- Wide range of demonstration equipment for demonstration and pilot installations;
- Products and solutions from major vendors;
- Our architects and engineers have a wide range of certificates for the implementation of various solutions.
